Management and Leadership

Environmental Policy Statement

District Moving Companies Inc. is committed to a clean, safe and healthy workplace and environment. All aspects of our business are managed in a safe and environmentally responsible manner in accordance with the principles in this policy. We believe these actions benefit our customers, employees and the public, both now and for the future, while improving the quality of the environment. This policy reaffirms our commitment to environmental stewardship and protecting the well being of our customers, employees and the public.

Environmental Restoration or Community Environmental Projects

We have certified wetlands and ponds on our property that we maintain in accordance with the Department of Agriculture of Charles County. We ensure that we maintain the property to the standards set at all times through out the year. Our staff follows all of the department's regulations as well as any suggestions they offer to better accommodate for the well being of these wetlands.

Waste

Solid Waste Reduction and Reuse

Our company does several thousand jobs a year and almost all of them require packing items into corrugated cardboard totes that aren't recycled even after one use. By switching to heavy duty plastic crates, we are able to pack

items, move and then reuse them. We estimate that with this practice, we are reducing 8 tons of cardboard waste per year. This amounts to a reduction of 45 metric tons carbon equivalent (MTCO₂E) in greenhouse gas reductions annually.

Hazardous Waste/Toxic Use Reduction

Anytime one of our trucks is serviced for an oil change, our mechanics recycle and reuse the motor oil. We have a place on the property outfitted with all necessary items to change the oil and dispose of it properly with specially designed 55 gallon drum tanks

Transportation

Fleet Vehicles

In 2009, District Moving Companies purchased and added Smart car vehicles to our fleet lineup for our employees to use whenever traveling for company appointments and or errands.

Water

Stormwater Management and Site Design

District has a contract with a local landscaping company to ensure that the property is always properly landscaped and kept up to defined standards. This is not only used to keep the property looking nice, but also to help with any run off from surfaces where our fleet of vehicles is located.

Profile Updated January 2016

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
