

**Maryland
Green Registry
MEMBER**

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Employee/Public Health Wellness Screening

Member since December 2009

Waste

Recycling

We recycle paper, plastics and cans.

Energy

Energy Efficiency

We turn off exam room lights when not being used and unplug and power off tools and machines at the end of the business day.

Transportation

Employee Commute

Our wellness coordinators work from home.

Efficient Business Travel

Staff meet at a common location and then travel in a company van to scheduled screening events. We estimate that this saves at least 10,000 miles of vehicle travel per year. This amounts to 455 gallons of gas, \$1,183.00 in gas cost savings, and a reduction of 61.674 lbs of hydrocarbons, 460.352 lbs of carbon monoxide, 9160.0 lbs of carbon dioxide and 30.617 lbs of nitrous oxide emissions. We also reduce business travel through teleconferencing and ridesharing to special conferences.

Fleet Vehicles

We ensure that tires are properly inflated and rotated on a regular basis, use gas cleaning supplies and perform other scheduled vehicle preventive maintenance.

Profile Updated June 2012

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
