Energy Auditor

Member since September 2009

Management and Leadership

Environmental Team

We have a two-member team that meets weekly endeavoring to reduce waste through sustainable practices.

Environmentally Preferable Products and Services

We do energy audits for LEED, Energy Star, and Energy Efficient Mortgages (EEMs) plus due diligence inspection services for commercial and residential properties.

Energy

Energy Efficiency

We upgraded the envelope insulation of our building which reduced our annual Btus consumed by 28% reduction.

Transportation

Efficient Business Travel

We have incorporated teleconferencing instead of airline travel for meetings with other business associates located in the mid-west.

Fleet Vehicles

80% of our service requires transportation to the client location. We've reduced our environmental impact by switching service vehicles from low mileage (18mpg) trucks to low (48 mpg) use vehicles

Water

Stormwater Management and Site Design

We installed a tiered embankment system with a sub-grade permeable layer to improve groundwater penetration through a clay layer.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
