Management and Leadership

Environmental Policy Statement

- *We are committed to recycling as many materials as possible. We will attempt to recycle and reuse as many materials as possible onsite.*
- *We will be committed to following our Material/Waste Minimization Plan.*
- *We will look to deploy new processes and technologies to help reduce waste and prevent pollution.*
- *We will create and search for new processes to help improve organizational performance and reduce/eliminate the impact of pollutants on our natural resources.*

Environmentally Preferable Products and Services

We invented and use the Bonny Marlin System[®], a non-hazardous paint gun cleaning and solution recycling system. It produces no hazardous waste, uses an EPA recognized, non-hazardous, non-flammable low VOC solution to clean our paint guns. www.bonnymarlin.com

Waste

Recycling

We recycle cardboard, scrap metal, office paper and plastic.

Hazardous Waste/Toxic Use Reduction

By using our Bonny Marlin System®, we have reduced our VOC emissions by approximately 35%. We do not have to handle hazardous waste by having our employees recycle or prep for off-site recycling.

We also use the BASF Waterborne Paint system for refinishing our customers collision damaged cars. Using this system of water-based paint versus solvent-based paint, we are reducing our paint emissions (measured in lbs of VOCs) by approximately 47% for a calculated savings of 24 lbs per month or 294 lbs per year. The paint is also almost odorless and much more user friendly.

Water

Water Conservation

We outsource about 90 car washes a month saving about 1,350 gallons of water per month through facilities that recycle their wash water.

Other

- 2002 National Pollution Prevention Roundtable Most Valuable Pollution Prevention Award for the invention and implementation of the Bonny Marlin System.*

2002 Businesses for the Bay Awar

2009 Montgomery County Recycling Award Winner

Profile Updated March 2015

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
