Solar Energy Design & Installation

Member since June 2009

#### Management and Leadership

##### **Environmental Team**

*Regional green team members meet monthly to coordinate green goals for the company. They release new green company initiatives every two months, such as greening transportation and reducing paper usage.*

##### **Environmental Policy Statement**

*Providing sustainable, world class clean energy products and service with quality and care.*

##### **Annual Goals**

*Reduce paper usage, use environmentally responsible packaging, reduce food waste, green our transportation (encouraging carpooling, telecommuting, etc)*

##### **Environmentally Preferable Products and Services**

*groSolar is North America's premier distributor, installer and integrator of solar energy solutions for residential and commercial installations. We install solar PV and thermal systems which reduce energy costs and fossil fuel usage.*

##### **Environmentally Preferable Procurement**

*We purchase recycled products, such as paper, where available.*

##### **Environmental Restoration or Community Environmental Projects**

*We donated a solar energy system to the Howard County Conservancy and provide education and outreach to area schools about solar energy.*

## Waste

**Solid Waste Reduction and Reuse**

*We use reusable packaging for transportation and storage and our kitchen is stocked with non-disposable flatware, cups and plates. We also reuse scrap paper by printing on both sides. This saves us 500 sheets, or 1 ream of paper per month. According to EDF's Paper Calculator, on an annual basis, this reduces greenhouse gasses by 154 lbs CO2 equivalent, 560 gallons of wastewater, and 51 pounds of solid waste.*

**Recycling**

*We recycle glass, paper, and plastic.*

## Energy

**Energy Efficiency**

*We have energy efficient lighting, ceiling fans, and operable windows to reduce AC usage. We also have environmentally responsible computing policies.*

## Transportation

**Employee Commute**

*We provide incentives for employee use of carpooling, public transit, and telecommuting via a reward system*

**Efficient Business Travel**

*We provide incentives for employee use of carpooling, public transit, and telecommuting, as well as utilize teleconferencing to support remote meetings between regional offices.*

**Fleet Vehicles**

*We use efficient turbodiesel fleet vehicles that utilize biofuels when available.*

**Profile Updated October 2010**

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
