

**Maryland  
Green Registry  
MEMBER**

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

## Management and Leadership

### **Environmental Policy Statement**

*Gibson's Inn is committed to protecting the environment and promoting sustainability. We believe that it is our responsibility to reduce our environmental impact and to be good stewards of the natural resources that we depend on. With buildings over 200 years old in our care, we understand the importance of preserving things for future generations. We continually work to reduce our carbon footprint and improve our local community.*

### **Environmental Team**

*All our departmental management is continually looking for ways to improve our green footprint. We meet as needed to discuss new ideas and communicate internally via email & text message to evaluate the changes that are being made. Management then educates their departments on the policies and practices so that all staff are working together towards the same sustainability goals.*

### **Annual Environmental Goals**

*Our inn uses Public Good brand Toiletries, refillable packaging made by 100% recycled post-consumer plastic bottles to reduce plastic waste. Their products are also made with organic ingredients and no toxic chemicals to reduce grey water levels. Since the switch, we no longer throw away 902,400 mini toiletries bottles a year. We evaluate our energy, water, and waste utilization each month and make adjustments to reduce our impact as needed.*

## Waste

**Recycling**

*We recycle paper, plastic, and aluminum items.*

## Energy

**Energy Efficiency**

*The lights in all common spaces are motion activated and use LED bulbs everywhere. When our property is unoccupied, all electrical items are turned off and unplugged. We also have energy efficient laundry and dryers for our linens.*

## Transportation

**Employee Commute/Customer Travel**

*Our full-time employees are on a 4-day, 10-hour work week to reduce fuel emissions.*

**Efficient Business Travel**

*We do phone or video meetings as opposed to in-person when applicable.*

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
