Subject: Work Plan Scope Change
MDE Case No. 2011-0112-HA and 2013-0007-HA
Bel Air Xtra Fuels Station
2476 East Churchville Road, Bel Air, Harford County, Maryland

Dear Ms. Bull:

I would like to confirm the changes that were discussed last week in the field to the Maryland Department of Environment (MDE) approved scope of work that is being performed at the Bel Air Xtra Fuels Site (MDE Case No. 11-0112HA). The work is being performed in accordance with the Well Installation Work Plan, Additional Activities April 12, 2013 approved by the MDE on June 4, 2013. During an onsite meeting with MDE on Monday, August 19, 2013, Jeannette DeBartolomeo of the MDE and Jen Maciejewski (the Brown & Caldwell geologist onsite) reviewed the locations of the proposed monitoring well sets and discussed the safety concerns with the installation of the nested monitoring well set proposed for the north side of Churchville Road. There is an overhead high voltage electrical line along the north shoulder of Churchville Road, and a Baltimore Gas & Electric (BGE) gas main that was marked out and confirmed by a BGE representative onsite (see figure attached). Due to these safety concerns, it was decided that only monitoring well MW-16 couplet on the south side of Churchville Road should be installed at this time.

Please confirm that MDE approves of the installation of the monitoring well couplet MW-16 only at this time.

Please call or email me with any questions. My direct line is 856-330-9406 and my cell is 302-545-4902.

Very truly yours,
Brown and Caldwell
