

# HOW TO SCOOP<sup>the</sup> POOP...every stinkin' time!

Sometimes, a dog's just gotta take care of some business...

When this happens, be sure to have biodegradable bags with you.

Use a biodegradable bag to pick up the dog waste.

Tie the bag and place it in a trash can.

# 24%

*of the bacteria that pollutes our urban and suburban waterways is from dog waste. You can help by picking up after your dog 100 percent of the time. Here are some tips on what you can do to help keep our watershed clean and healthy:*

 Throw out dog waste using a bio-degradable bag OR flush waste down the toilet (where it will eventually end up in a wastewater treatment plant).

 Start a campaign to get your community involved installing pet disposal facilities, poop scoopers and other convenient items to encourage locals to clean up after their pets.

 Always clean up after your dog on walks and in your own yard, and remind your neighbors and friends to do the same.
