

October 1, 2016

The Water Management Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Monday, October 31, 2016.

Water Supply Program - (410) 537-3590

County: Caroline
CO2014G018/02: Perry Comer, Inc. has applied to increase an existing appropriation from an annual average of 94,000 gallons of groundwater per day (gpd) and an average of 120,000 (gpd) in the month of maximum use to 1,050,000 gpd and 1,362,000 gpd, respectively. Water will be withdrawn from one dug pond in the Columbia aquifer and used for hydraulic dredging, and sand and gravel mining and processing. The project is located on the east side of Church Lane and west side of Greensboro-Goldsboro Road, Goldsboro, Caroline County, Maryland.
CO2016G013/01: Saathoff, Inc. has applied to appropriate and use an annual average of 135,900 gallons of groundwater per day (gpd) and an average of 920,000 gpd during the month of maximum use for crop irrigation at the Bell Farm. Water will be withdrawn from up to three new wells, all in the Columbia aquifer. The project is located west of New Bridge Road between Fisher and Tuckahoe Roads, southwest of Denton, Caroline County, Maryland.
CO2016G014/01: Beyla Farm, LLC has applied to appropriate and use an annual average of 13,500 gallons of groundwater per day (gpd) and an average of 27,000 gpd during the month of maximum use for a poultry operation at Beyla Farm. Water will be withdrawn from six new wells, all in the Piney Point aquifer. The project is located at 25489 Towers Road, Denton Caroline County, Maryland.
County: Cecil
CE2016G001/01: SunMed Growers, LLC has applied to appropriate and use an annual average of 19,600 gallons of groundwater per day (gpd) and an average of 61,000 gpd during the month of maximum use for greenhouse irrigation. Water will be withdrawn from two new wells, both in the Magothy aquifer. The project is located at 935 Cecilton-Warwick Road, Warwick, Cecil County, Maryland.
County: Garrett
GA2008G005/04: Maryland Energy Resources, LLC has applied to increase an existing appropriation from an annual average of 342,000 gallons of groundwater per day (gpd) and an average of 684,000 (gpd) in the month of maximum use to 1,500,000 gpd and 2,250,000 gpd, respectively, for dust suppression and dewatering of a deep coal mine. Water will be withdrawn from the Coal Seam of the Allegheny Formation. The project is located 0.7 miles north of Durst Road, 0.8 miles west of Bitteringer Road, approximately 1.6 miles northwest of Jennings, Garrett County, Maryland.

County: Wicomico

WI2016G021/01: Rural Integrity Land LLC has applied to appropriate and use an annual average of 68,400 gallons of groundwater per day (gpd) and an average of 416,100 gpd in the month of maximum use for crop irrigation. Water will be withdrawn from one well in the Columbia aquifer. The project is located on the east side of Rockawalkin Road and the west side of U.S. Route 50, approximately two miles southeast of Hebron, Wicomico County, Maryland.
