

April 2, 2018

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Monday, April 30, 2018.

Water Supply Program - (410) 537-3590

County: Caroline

CO2017G012/01: Levi Hayman has applied to appropriate and use an annual average of 103,400 gallons of groundwater per day (gpd) and an average during the month of maximum use of 628,700 gpd for crop irrigation. Water will be withdrawn from five new wells in the Federalsburg aquifer. The project is located at 12919 Holly Road, Greensboro, Caroline County, Maryland.

County: Carroll

CL2002G005/04: Town of Manchester has applied to appropriate and use an annual average of 25,600 gallons of groundwater per day (gpd) and an average of 38,400 gpd in the month of maximum use for a community supply for the Town of Manchester. Water will be withdrawn from two wells in the Upper Pelitic Schist of the Wissahickon Formation. This application seeks to combine two existing permits, CL2002G005 (annual average - 6,000 gpd, maximum month - 10,000 gpd) and CL2004G021 (annual average - 9,300 gpd, maximum month - 15,600 gpd) and requests an increase based on reported use. The project is located at 2770 Washington Way, Manchester, Carroll County, Maryland.

County: Talbot

TA2017G004/01: Pact Two, LLC has applied to appropriate and use an annual average of 320,800 gallons of water per day (gpd) and 880,000 gpd during the month of maximum use for lowering the groundwater level to facilitate construction and upgrading of the Oxford Wastewater Treatment Plant. Water will be withdrawn from three wells and two foundation excavations in the unconfined Alluvium. The project is located at 103 J.L. Thompson Drive, Oxford, Talbot County, Maryland.

County: Worcester

WO2018G001/01: Newark Grain, Inc. has applied to appropriate and use an annual average of 123,200 gallons of groundwater per day (gpd) and an average during the month of maximum use of 749,000 gpd for crop irrigation at the Highland Farm. Water will be withdrawn from one new well in the Columbia aquifer. The project is located on the east side of Newark Road, approximately 0.4 mile northeast of the junction of Newark and Basket Switch Roads, Newark, Worcester County, Maryland.
