Eddie DuRant
MD

Dear Mr. DuRant,

I am concerned about the high level of ozone pollution in Maryland. Our families deserve better and Maryland should be a leader when it comes to environmental protection. I believe more needs to be done to protect the health of Maryland's families.

I would like to see Maryland take an aggressive approach to reducing ozone pollution. Because coal plants are a major contributor to ozone pollution I would like to see Maryland implement the strongest possible environmental protections that require coal plants to install and operate the best state-of-the-art pollution controls to protect Marylanders' health.

Sincerely,
