

ACCOUNTING FOR GROWTH WORK GROUP

Meeting #2 Essential Reading

February 15, 2013

Review the materials on the Maryland Nutrient Trading Program website (www.mdnutrienttrading.com) and watch the video at the bottom of the home page. Both the website text and agricultural nonpoint policy documents are currently being updated to reflect the Tributary Strategies with the Bay TMDLs and add a number of policy revisions made by the Maryland Agricultural Nonpoint Nutrient Trading Advisory Committee. The document “Producing and Selling Credits in Maryland’s Nutrient Trading Market: Guidance for Agricultural Producers and Landowners in the Chesapeake Bay Watershed” is current and incorporates all changes, including the latest version of the online calculation tool.

Documents:

- Producing and Selling Credits in Maryland’s Nutrient Trading Market: Guidance for Agricultural Producers and Landowners in the Chesapeake Bay Watershed
- AfG Pollutants, Sources, Loads, and Scale: Background and Support Material
- Executive Summary, Nutrient Credit Trading for the Chesapeake Bay by the Chesapeake Bay Commission –
