Management and Leadership

Environmentally Preferable Products and Services

As our company motto states, we take "A sustainable approach" to creating beautiful space. We are pioneers in the field of green building, and are experts in creating energy efficient and healthy residential buildings.

Waste

Solid Waste/Material Use Reduction and Reuse

*On every remodeling job, salvageable materials are removed and donated to The Community Forklift. Many of our projects include features made by local artisans using scrap steel and urban harvested wood. See for example:
http://abramsdesignbuild.com/kinzer_abrams.htm*

Recycling

Construction debris is hauled by Northern VA Waste, which certifies recycling of wood, sheetrock, concrete, and other fungible materials.

Energy

Energy Efficiency

We are the originators of the concept of the Net Zero Addition. See:

<http://abramsdesignbuild.com/zeronetadditions.htm> In addition, Alan is a Certified Passive House Consultant.

Transportation

Employee Commute

Our office is a twenty minute walk from the Takoma Park Metro. Alan lives three miles away, and rides his bicycle most days.

Fleet Vehicles

Our company vehicle is a VW Jetta TDI diesel.

Water

Water Conservation

We recommend and provide dual flush toilets and foot valve controlled kitchen sinks on all our projects.

Stormwater Management and Site Design

Wherever possible, we incorporate rain gardens, vegetated roofs, and porous pavement into our projects. See: http://greenbuilding.abramsdesignbuild.com/site_design/ and <http://abramsdesignbuild.com/hagen.htm>

Other

- Alan Abrams is a Certified Passive House Consultant. He is also the founder and chair of the Universal and Sustainable Design Committee of the American Institute of Building Design. Our company recently won the first NARI Metro DC "Best in Show" Green Remodeling Award.*

Profile Updated May 2012

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
