Management and Leadership

Environmental Policy Statement

R&M Enterprises Inc. t/a Buttonwood Beach Recreational Vehicle is committed to reducing our impact on our environment. We have begun implementing standards and procedures through our employees and patrons to reduce our impact on the environment.

We are committed to: Complying with all applicable environmental regulations, promoting our Environmental Initiative with employees, patrons, and community, preventing waste whenever we are able, and encouraging the development of our Environmental Initiative.

Waste

Solid Waste Reduction and Reuse

We have a plan in place to reduce property waste, track overall waste bills and established baseline data for quantity of wastes produced, and set a numeric goal of overall waste reduction.

In our Laundry Rooms/Bath Houses, we purchase everything in bulk and use high efficiency hand dryers as well as washers and dryers to reduce paper

towel waste. To reduce paper usage in our office, we receive electronic, paperless bills, make two-sided copies and reuse scrap paper.

Recycling

We recycle glass, aluminum cans, plastic, office paper, cardboard and estimate our recycling total to be around 3,200 pounds annually.

Energy

Energy Efficiency

We have a plan in place to reduce property energy usage, track overall energy bills and establish baseline energy usage. We had an energy audit to identify efficiency opportunities, and have an energy management system in place to track and meter energy usage. We have a high efficiency heating and air-conditioning HVAC system, regularly perform preventative maintenance on HVAC system, and keep office doors and windows closed if HVAC system is on.

Water

Water Conservation

We have a plan in place to reduce property water usage, perform preventative maintenance to stop drips and leaks. We have low flow restrictors on faucets and showerheads and aerators on faucets.

Other Green Practices

- Last year, we began using plain yeast as a treatment for our 90 septic tanks. We've seen fewer stopped up sewers, fewer failed drain fields, and we've significantly reduced the amount of chemicals being used in the park.*

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
