Management and Leadership

Environmentally Preferable Products and Services

Our work involves numerous stream restoration, wetland creation, and habitat enhancement projects for the U.S. Department of Defense.

Environmentally Preferable Purchasing

Environmentally friendliness is considered for all purchases and green selections are made when possible. Examples of our purchasing include Rumpl blankets made from 100% recycled material, toilet paper and paper towels made from bamboo with recycled packaging, copy paper made from recycled content, and compostable eating utensils, cups, and plates.

Waste

Solid Waste Reduction and Reuse

Packaging from orders received is reused to send supplies to employees.

Recycling

All materials recyclable by Baltimore County are placed in separate containers and recycled via curbside recycling. This reduces the amount of trash going to the landfill significantly.

Composting

Food waste is composted in a receptacle on site and yard waste is collected and recycled via curbside yard waste pick up.

Energy

Renewable Energy

Our headquarters main building roof is equipped with solar panels which produce approximately 7,500 kWh per year. The pavilion on site is also completely powered by solar energy. In total, our solar energy system has generated more energy than we consume leading to 24 RECs traded to date.

Transportation

Employee Commute/Customer Travel

Carpooling and work from home office days reduce the number and length of employee trips taken.

Efficient Business Travel

Teleconferencing is our main mode of communication in place of in person meetings.

Efficient Fleet Vehicles

Our company vehicle is a hybrid vehicle.

Water

Stormwater Management

The pavilion on site at headquarters is constructed with a green roof, reducing our impervious surface footprint. The parking pad is constructed of stone which also reduces our impervious surface footprint.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
