

Maryland Green Registry MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Management and Leadership

Environmental Team

We've designated an "Environmental" steward at each office to continue to look for ways to be proactive.

Annual Environmental Goals

We have established a goal of saving \$250 a month for each of our four offices through the implementation of various "Green" projects and practices.

Environmentally Preferable Purchasing

We purchase only re-cycled paper and plastic cups.

Environmental Restoration or Community Environmental Projects

We participate in the Baltimore County "Green" Festival and host bi-annually a "think green" day for employees and their families. This centers on landscaping at each of the offices using environmental guidelines (better shading to lower heating costs, etc).

Waste

Recycling

Our offices now have segregated disposal bins for metal, paper and food waste.

Energy

Energy Efficiency

We installed an “intelligent” thermostat at our Headquarters. Our utility bills have been cut by almost 50%/month. The system operates so that during non-working hours, it lowers the temperature (in the winter) to 62” and in the summer, raises temperature to 78”

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
