Manufacturer of stormwater capture products

Member since February 2017

Management and Leadership

Environmentally Preferable Products and Services

PaverGuide is a stormwater capture system used to replace stone as a base below permeable pavements. The PaverGuide filtering media can be used as a structural sub base below PaverGuide and in other BMP's. The media removes phosphorous, nitrogen, copper, lead, and zinc from stormwater.

Environmentally Preferable Purchasing

PaverGuide grates and grids are made from 100% recycled plastic and the PaverGuide media contains material typically sent to a landfill.

Waste

Recycling

All materials the recycler will process including paper, plastic, steel, aluminum, and cardboard.

Energy

Energy Efficiency

We replaced windows and doors and installed new insulation throughout the facility.

Transportation

- Employee Commute**

Work from home office.

Water

- Stormwater Management and Site Design**

We removed 3,200 square feet of impermeable concrete in the driveway, sidewalk, and patio and replaced it with a PaverGuide stormwater capture system and permeable pavers.

Other

- PaverGuide, Inc. is receiving funds from the [Chesapeake Bay Seed Capital Fund](#).*

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
