Farm, education, and retreat center  
Member since February 2017

## Management and Leadership

### Environmental Policy Statement

*Sustainability is at the core of Pearlstone's operation and community engagement program, as described on our [website](#). The Pearlstone Sustainability Policy was approved by the Pearlstone Board of Directors in May 2017. The overarching policy is summarized here:*

*"Pearlstone is committed to operating and promoting a sustainable organization – one that minimizes its impact on the environment, places value on and promotes human health and well-being, and operates as efficiently and economically as possible.*

*Through programs such as energy efficiency, water conservation, waste prevention, environmentally responsible procurement, and employee, visitor, and community education, Pearlstone will evaluate its current operations, strive to improve its sustainability performance, and implement more sustainable business practices."*

### Environmental Team

*Pearlstone has a Green Wellness Team that meets monthly. The purpose of the team is threefold: (1) Activate the Sustainability Policy; (2) Raise awareness of sustainable practices; and (3) Facilitate education to help stimulate ideas and actions for system improvements. Team members' roles are to (1) Help align programs with the guiding principles of the Sustainability Policy; (2) Be an ambassador for promoting sustainability within department; and (3) Identify achievements, opportunities, and struggles for communication back to the team. Currently, the Green Wellness Team is working on enhanced waste separation and signage as well as a Power Down Campaign for computers.*

**Environmentally Preferable Products and Services**

*Environmental Education:*

- *Pearlstone provides environmental educational opportunities for participants of all ages to learn about our connection to the earth through topics such as composting, vermiculture, pickling, natural dyeing, and using natural resources to create lip balm and salve.*
- *Pearlstone offers an environmental adventure camp which is a farm and forest experience; as well as a week long immersive experience for 5th and 6th graders on becoming guardians of the earth.*

*Sustainable Food and Agriculture:*

- *In 2107, Pearlstone's Farm was certified as a U.S.D.A. Organic Farm!*
- *Pearlstone has an Ethical Food Policy, and is committed to nourishing guests in body, mind, and soul. Pearlstone food honors the bounty of the seasons, the traditions of our ancestors, and the integrity of sustainable agriculture. Pearlstone provides 100% consciously sourced, wholesome, delicious food inspired by crops grown on our farm and prepared with love and care.*
- *Pearlstone embraces farming practices in line with traditional Jewish practices which includes the implementation of a shmita, or rest year, where the land is left fallow. Drip irrigation is used to conserve water in 2018, Pearlstone planted a U-Pick strawberry field where community members can enjoy handpicking organic fruit. The Pearlstone farm grows food to supply the kitchen with ingredients for plant-based meals for guests.*

**Environmentally Preferable Purchasing**

*Pearlstone developed criteria for product specification to use during remodeling and renovation of the conference center and lodge buildings.*

**Environmental Restoration or Community Environmental Projects**

*As part of Pearlstone's Community Sustainability program, the Center launched the Pearlstone Sustainability Coalition. Volunteer members of the Coalition include representatives from Baltimore region synagogues, institutions, non-profits, private sector, and individuals. The Pearlstone Center and the Sustainability Coalition it facilitates is committed to catalyzing change towards greater sustainability and environmental health in Baltimore's Jewish community. One of the [large-scale projects](#) is the aggregation of the electrical demand of The Associated agencies. Pearlstone is a proud partner for a large-scale solar array, which will be located in Anne Arundel County, and will be built to offset its electricity consumption. When the farm becomes operational in late*

2019 to early 2020, it is estimated that one-half of The Associated's electricity for all its buildings, including the Jewish Museum of Maryland and Pearlstone Center, among others, will be offset through this project.

## Waste

### **Composting**

*Pearlstone reduces food waste per the EPA Food Recovery Pyramid. From our farm, in 2017 we donated 10% of our harvest which amounted to 5,000 pounds of organic produce to local food bank and food rescues; in the kitchen, we implemented portion control strategies; in the dining room and kitchen, we collected 31,000 pounds of food scraps which we compost on site with yard and farm debris. In 2017, we generated 60,000 pounds of biologically rich compost that we gifted back to the earth.*

## Energy

### **Energy Efficiency**

*Pearlstone has implemented energy conservation measures (ECMs) in the conference center and lodges to reduce usage and associated costs. Compared to the baseline year of 2015, Pearlstone realized a 28% decrease in site EUI at year end 2017! This corresponds to a 30% decrease in cost and a 27% decrease in total GHG emissions. The most significant ECM was the installation of a building automation system.*

### **Renewable Energy**

*Pearlstone utilizes a solar water installation to provide hot water to the kitchen. It is saving Pearlstone about 30% each year in propane usage.*

## Water

### **Water Conservation**

- *Utilized throughout the Pearlstone farm is a drip irrigation system for watering plants efficiently without wasting water.*
- *Faucets throughout the building and lodge rooms have aerators which reduce the amount of water flowing from the faucet to conserve water.*

## Environmental Certification Programs, Awards, and Other Activities

- ☑ *In 2016 and 2017, Pearlstone received the [Hazon Seal of Sustainability](#). The Hazon Seal of Sustainability provides a roadmap to advance sustainability-related education, action, and advocacy in the Jewish community. In 2016, a pilot cohort of Jewish institutions across the country, including Pearlstone, received the Seal certification, and a 2017 cohort has joined the Hazon Seal.*

*With support from BGE's Green Grant program, Pearlstone designed and built a Sustainability Kiosk in our lobby. The Kiosk is an interactive, electronic station that explains and explores sustainability issues at Pearlstone and provides information on how users can be more sustainable at home. The custom-made wooden casing is created from reclaimed wood from a local barn.*

*In 2018, Pearlstone Center received a Maryland Green Registry Leadership Award.*

**Profile Updated May 2018**

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
