

Maryland Green Registry MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Waste

Solid Waste Reduction and Reuse

We added 5-gallon water dispensers around the workshop to cut down on water bottle waste.

Recycling

We added recycling bins all around the shop and recycle the following items:

- Soda Cans
- Plastic Bottles
- Plastic plant containers
- Motor Oil Containers

We also recycle used motor oil at designated facilities.

Composting

We compost all grass and leaf clippings from our jobs.

Energy

Energy Efficiency

We heat the shop and office with a wood burning stove, which saves us roughly \$3500 per year.

Transportation

Employee Commute

All employees carpool to work together and ride to their jobsites together, thus reducing car pollution.

Maryland

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
