Management and Leadership

Environmentally Preferable Products and Services

We use a variety of environmentally preferred products such as our paper bags, which are made from 100% post-consumer products and are Rainforest Alliance certified. Our paper cups are certified by the Sustainable Forestry Initiative and our coffee sleeves are made from 100% recycled material with at least 99% post-consumer product. Our napkins are also made with 100% recycled material and 40% post-consumer product. Our bath tissue is 100% recycled with at least 20% post-consumer product.

Environmental Restoration and Community Environmental Projects

Our store has a Grounds for your Garden program where we donate used coffee grounds to Crofton residents for use in their gardens, compost, etc.

Waste

Recycling

Currently, our store recycles an average of 60 milk jugs per day along with a variety of cardboard products such as boxes and juice cartons. We also provide opportunities for our customers to recycle while in the store.

Composting

We save all the used coffee grounds from daily operations and offer them to the community for use in composting. We hand out free bags at farmers markets, community gardens, and to Crofton residents.

Energy

Energy Efficiency

We use energy efficient bulbs for our store that on average save 64,600 kWh per year. We also have motion sensor timers installed in the bathrooms to turn off lights when not in use.

Environmental Certification Programs, Awards, and Other Activities

- Starbucks/Arizona State University Greener Apron class certified. The Greener Apron course covers global environmental challenges and provides insight into how Starbucks is working to advance sustainable practices. Participants leave the course ready to practice sustainability on the job, in their home, and in their neighborhood.*

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
