

Maryland Green Registry MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Management and Leadership

Environmental Restoration and Community Environmental Projects

We practice sustainable forestry practices and take down only trees that are diseased or affect our guests' safety.

Environmentally Preferable Products and Services

We teach "Leave No Trace" principles to school groups and also teach them about the Chesapeake Bay Watershed.

Waste

Solid Waste Reduction and Reuse

We re-use items where we can. For example, we re-use participant gear by cleaning it vs. throwing it away. We use old cardboard for our build-a-boat, catapult, and fort team-building initiatives.

Recycling

We recycle an estimated 500 lbs. of mixed recyclables (paper, plastic bottles, and cans) annually.

Transportation

Employee Commute

Our staff carpool to work, saving about 500 miles of vehicle travel annually.

Water

Stormwater Management and Site Design

We minimize storm water run-off by putting in 125 cubic yards of wood chips every year to create a permeable surface.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
