

Maryland
Green Registry
MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Junk Removal and Recycling

Member since February 2016

Management and Leadership

Environmentally Preferable Products and Services

We provide cleanout services for estate sales and customers that are relocating or downsizing to a smaller home. We repurpose as much as possible and give credit for good resalable items. Reuse and recycling help our environment and benefit charities in our community.

Waste

Solid Waste Reduction and Reuse

We donate or recycle at least 70% of removed materials so that less winds up in the landfill. Items that we take to donation centers for reuse include clothing, furniture and appliances.

Recycling

We recycle paint, cardboard, concrete, stone and brick, metal and appliances.

Transportation

Efficient Business Travel

We try to schedule multiple jobs in the same vicinity.

Fleet Vehicles

We use different sized vehicles depending on the job and with the goal of making fewer trips to the landfill.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
