Management and Leadership

Environmental Policy Statement

[Sustainability | Von Paris Moving & Storage](#)

At Von Paris Moving and Storage, we embrace conservationism and sustainability as core values and we serve as an industry leader in developing creative processes to promote conservationism, sustainability, and increase efficiency. We also recognize the importance of safeguarding the health and well-being of future generations through our sustainable operations.

The mission of Von Paris Moving & Storage's Sustainability Program is to integrate conservatism and sustainability into all aspects of our business. Our vision is to lead by example in the moving industry by adopting conservative and sustainable practices that reduce waste, conserve resources, and mitigate environmental impacts.

Von Paris Moving and Storage strives to contribute positively to our community and help build a strong future for generations to come.

Energy

Energy Efficiency

We have upgraded our HVAC units to Variable Frequency Drive to reduce run time and increase efficiency. We have also installed a Building Automation System which constantly monitors temperature and minimizes energy consumption.

Transportation

Employee Commute/Customer Travel

We analyzed our employee commuting distances and determined that we had members driving long distances to do work that could be done remotely. We therefore implemented a hybrid work model and promote remote work for our team members who can perform their work from home. We have reduced employee travel by over 4,000 miles just this year.

Efficient Business Travel

We have invested in technology and increased the frequency of teleconferencing instead of having many in-person meetings. This reduces the need for our team to travel long distances and makes us more efficient.

Water

Stormwater Management

We have a stormwater management pond that absorbs water from parking lot, etc. We capture water and process it before it is released to the nearby waterways.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
