Audio/Visual Integrator and LED Lighting

Member since August 2014

Management and Leadership

Environmentally Preferable Products and Services

Bethesda Systems provides lighting assessments and LED retrofit services for residential homes (LED Diet) and commercial buildings. A whole home LED retrofit can save up to 80% of the energy required to light a home.

Environmental Restoration or Community Environmental Projects

Bethesda Systems hosted a National Drive Electric Week event in September 2014 to showcase EV cars and accessories.

Waste

Recycling

We properly recycle all CFLs to ensure that all mercury is contained. We also recycle cardboard, cans, wires and paper, and office supplies. We often reuse our technology and are in the process of recycling the items we can't reuse.

Energy

Energy Efficiency

All of our facilities are equipped with LED lighting. We save over 400 kWh annually by having LEDs in our facility.

Transportation

Employee Commute

We encourage our employees to commute together, which a good number of them do. We also have electric and hybrid company vehicles.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
