Management and Leadership

Environmentally Preferable Purchasing

One of our core values is to b'more green. So we aim to purchase as sustainably as possible. If we buy T-shirts, they're made from organic cotton. The cups we use to do our samplings are compostable. Any paper products we buy must be recyclable. We purchase our electricity for our office and plant that's 100% certified wind.

Independently-Audited Environmental Management System

We are a [B Corp](#) certified company which means that all of our environmental claims must meet rigorous standards of social and environmental performance, accountability, and transparency.

Waste

Solid Waste Reduction and Reuse

At our plant, we repurpose all of our excess whey as food for local pigs rather than pouring it down the drain or having it sit in an acid lake like large Greek yogurt makers do.

Recycling

We recycle paper, glass, and aluminum and compost organic matter.

Energy

Renewable Energy

Both our plant and our office use 100% wind-powered electricity per year.

Transportation

Fleet Vehicles

Our company car is as a Chevy Volt EV. We travel over 15,000 miles on electric saving 350 gallons of gasoline and avoiding 1,000 lbs CO2 per year.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
