Management and Leadership

☑️ Environmental Policy Statement

*Imprint Products is continually evaluating how we can be more self sustainable – from recycling to providing our customers with products ideas made from recycled or recyclable materials.*

☑️ Environmentally Preferable Products and Services

*Imprint Products teams up with our suppliers to recommend earth friendly products to our clients. We encourage clients to consider items like reusable grocery bags as a practical promotional item, products using recycled paper with soy or vegetable based inks, and other items that are recycled or recyclable.*

☑️ Environmental Restoration or Community Environmental Projects

*We are currently working with our local representative from the Cheswolde Association to arrange a major clean-up of the Willowglen stream which feeds into the Jones Falls stream. The project will include local school children participating as part of their community service.*

Waste

☑️ Solid Waste Reduction and Reuse

*We predominately e-mail information including price quotations, proofs, acknowledgements, invoices etc., to our clients instead of using hard copies. We*
have reduced our paper catalog library by at least 30%, and are using more social media to promote ourselves and reduce paper use. We also print double sided on all office paperwork.

Imprint Products reuses all possible packing material and reuses packing cartons as much as possible. All cups and eating utensils are reusable and washed and reused.

☑️ Recycling

Imprint Products recycles all paper, glass, aluminum, plastic and packing materials. In the month of January 2010, we recycled approximately 600 lbs of paper.

Energy

☑️ Energy Efficiency

We have seasonally adjusted all thermostats to reflect the temperature changes. Ceiling fans are utilized in the office area allowing for higher thermostat settings in the summer months. The heat/air conditioning is turned off after office hours. We are using energy efficient light bulbs. Computers are turned off every night and not left in “sleep” mode.

Transportation

☑️ Employee Commute

No commuting is necessary on a regular, daily basis.

☑️ Efficient Business Travel

We consolidate trips to clients and suppliers.
