

Maryland Green Registry MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Management and Leadership

Environmentally Preferable Products and Services

We help to inform our clients of the BGE Smart Energy Savers programs that are available to them.

Environmentally Preferable Purchasing

We have purchased furniture made from recycled materials, including our desks, a couch made from recycled plastic soda bottles, and a conference room table and chairs made from wood recycled from a boat found at the bottom of a river.

Waste

Solid Waste Reduction and Reuse

We use electronic signatures on contracts to reduce paper use and the continuous faxing and printing of contracts.

We mostly use email rather than direct mail for all of marketing ads, announcements and flyers.

Recycling

We recycle plastic, paper, aluminum, and glass.

Composting

We have a composting bin at our office for food and yard waste. We also encourage neighborhood children to get involved by dropping off bags of kitchen scraps.

Energy

Energy Efficiency

We have replaced lighting with energy efficient bulbs.

Transportation

Efficient Business Travel

Our owner replaced a vehicle that got 14 mpg with a hybrid vehicle that gets 44 mpg, reducing fuel usage by 619 gallons annually.

Profile Updated July 2015

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
