Management and Leadership

Environmental Policy Statement

Our company mission statement and environmental policy statement is "To conduct all our business with honesty, integrity and fairness and consider our impact on the Earth in our services and practices."

Environmentally Preferable Products and Services

Wherever possible, we offer organic and horticultural products to our clients. All fertilizers used are organic. Native plants, rain gardens and permeable paving options are always encouraged.

Waste

Recycling

All plastic plant pots are recycled saving at least 40 cubic yards annually from being land-filled. All demolition involving concrete or asphalt is recycled through White Brothers Trucking.

Water

Water Conservation

We have converted 30% of our plant holding area to drip irrigation replacing conventional spray heads, reducing water use by 40% in that section.

Transportation

Employee Commute

In 2009 we issued a company vehicle to our field supervisor reducing his need to commute to and from our shop on a daily basis.

Other

Nature's Artisans provided the (90% native) landscape design and installation for the U.S. Green Building Council Maryland 'Green New Construction Major Renovation Project of the Year' for 2009.

Profile Updated May 2013

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
