Management and Leadership

Environmentally Preferable Procurement

We purchase 100% recycled copy/printer paper, as well as folders, envelopes, cleaning supplies, paper towels, toilet paper, tissues and Post-Its. We also use recycled paper with soy ink for our stationary and business cards. Our beverages are primarily organic products as well (coffee, tea, etc.). Wherever possible, we buy reused, recycled, and/or organic products.

Waste

Recycling

We recycle all paper, cans, bottles, and plastic via Baltimore City's recycling program.

Energy

Renewable Energy

100% of the power used is generated from wind power through Washington Gas Energy Services (~500 kWh per month used).

Transportation

Employee Commute

Owner walks to work daily (no longer owns a car) which cuts down driving by 3 miles per day (or more if owner worked farther from home).

Efficient Business Travel

Travel to DC is done via the MARC train to Union Station and then the Metrol while in DC and Northern Virginia.

Other

Member of the EPA Green Power Partnership.

Profile Updated February 2017

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
