

**Maryland
Green Registry
MEMBER**

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

Pfister Energy of Baltimore

3915 Coolidge Avenue

Baltimore, MD 21229

410-242-2449

Turnkey Renewable Energy Provider

Member since November 2013

Management and Leadership

Environmentally Preferable Products and Services

Pfister Energy is a leading solar installer offering innovative onsite power solutions so that our clients can control costs, save energy and generate an excellent return on investment.

Environmentally Preferable Purchasing

We buy from local vendors when possible. Our main electrical supply vendor is less than one mile from our shop.

Environmental Restoration or Community Environmental Projects

We installed solar panels, a wind turbine and daylighting units at the Harford Glen Environmental Center. Harford County Public School students can now come here to learn how renewable energy works and ways to save energy.

Waste

Solid Waste Reduction and Reuse

We re-use all pallets and many packing materials from jobsite to jobsite.

Recycling

We recycle all office paper, plastic bottles and package wrapping.

Energy

Energy Efficiency

Due to natural daylight, the lights are rarely used in the office. The heat/AC are lowered/raised respectively every night and on weekends. Only office areas that are currently in use are heated and cooled.

Transportation

Fleet Vehicles

We use Force Fuel additive in all of our trucks providing 15% to 20% fuel savings.

Water

Water Conservation

We use cold water only. No hot water is used at the facility.

Profile Updated March 2015

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
