Building Energy Efficiency Solutions and Technology

Member since April 2015

Management and Leadership

Environmental Policy Statement

Skywalk, SOL VISTA's proprietary SaaS platform, empowers commercial building owners and managers to improve the performance and profitability of their buildings. We also extend the benefits of our energy management solutions to our internal office environment practices. The SOL VISTA corporate culture is centered around promoting and supporting environmentally friendly energy conservation policies. Our operations manual clearly defines a range of procedures and recommended practices, such as:

- *Staff-wide commitment to recycling*
- *Enter/Exit procedures for setting the thermostat for minimize energy usage when the office is not occupied*
- *Enter/Exit procedures for lights to minimize energy usage when the office is not occupied*
- *Setting staff laptops and monitors to low-energy use, eco-friendly settings*

Environmental Team

SOL VISTA's team members are committed to sustainability and take environmental considerations into account every day in our office, with our energy partners, and at our customer properties. Our mission is to make commercial buildings energy efficient by reducing waste and consumption without negative impact to the guest/tenant experience and comfort. By doing so, we improve both energy savings and building profitability. Our vision is to make environmental sustainability business-as-usual in the commercial building industry. Our team often includes third-party partners in the energy and engineering sectors. Our

customer engagements, conducted in conjunction with such partners, range from conducting energy and water audits to identifying and implementing both short and long-time building equipment and infrastructure improvements/replacements that yield significant energy savings. We work side by side with the building operations personnel to ensure timely and expert energy project implementations. Our technology platform provides ongoing energy monitoring and visibility into potential future cost drivers, ensuring that buildings have an early alert system that enables them to prevent unnecessary energy waste.

SOL VISTA's work makes an environmental difference: Every kilowatt, therm, or gallon of water saved at one of our properties reduces the world's resource needs and helps combat GHG emissions.

Environmentally Preferable Products and Services

Skywalk, SOL VISTA's proprietary SaaS platform, empowers commercial building owners and managers to improve the performance and profitability of their buildings. We impart years of energy consulting, real estate investment, building operations, and software experience to each new engagement. Our energy management solutions have enabled more than 200 hotels to:

- *Lower energy and water costs by 15-50 percent while maintaining guest comfort*
- *Save an average of 20 percent on current energy expenditures through competitive procurement*
- *Comply with energy benchmarking mandates across the U.S.*
- *Gain recognition for sustainability efforts*
- *Increase building profitability and value*

Our onsite services leverage Skywalk, our SaaS platform, to transform energy and water data into results that significantly reduce utility consumption and supply costs.

Our Energy management and improvement services include:

- *Energy & Water Audits, in which our onsite inspection teams identify ways to cut utility waste;*
- *Retrocommissioning, in which our teams find and correct problems related to water, gas, and electric infrastructure equipment and systems;*
- *Energy Project Management, in which our teams handle both small to large-scale retrofits and upgrades, from LED lighting to central plant overhauls;*

- *Incentive Administration, in which we identify sources of and secure payments of cash rebates for installing various energy efficient equipment; and,*
- *Energy Procurement, in which we renegotiate better utility rates for our customers.*

At more than 200 hotels, including many well-known brands and properties such as Hilton, Westin, Marriott, Ritz Carlton, and Hyatt, we have successfully delivered actual utility cost savings of 20 to 50 percent.

*At the **Doubletree Bethesda**, SOL VISTA cut energy use by 10%, raised ENERGY STAR score by 10 points, and secured \$100,000 for the hotel in energy incentives. At **Parkview at Spring Street** office building (Silver Spring, Maryland) SOL VISTA delivered a 30%+ reduction in utility use/cost since beginning to monitor the building.*

SOL VISTA is committed to providing its energy efficiency solutions to its home state of Maryland and has worked with over 20 different properties in the state. Our national client list can be found here:

<http://www.solvista.com/clientlist.html>

Waste

Solid Waste Reduction and Reuse

SOL VISTA endeavors to eliminate unnecessary waste and to recycle materials in an environmentally responsible manner. Our team members reduce waste and promote reuse in the following ways:

- *Send reports and information electronically via email or other electronic methods instead of by paper and mail*
- *Electronic file storage (via Microsoft SharePoint cloud storage)*
- *Post company announcements electronically*
- *Print or copy on both sides of paper*
- *Reuse toner cartridges when possible and refill them instead of purchasing new ones.*
- *Reuse dishware, glassware, and other eating utensils*

Recycling

SOL VISTA's operations manual states that all team members must engage in sustainable recycling practices. There are approximately 8 recycling containers placed throughout the office for our staff. We bring all recycling bins

outside our suite at the end of each day; the recycled materials are then properly processed by the building's custodial staff. We also work with various local and county organizations to safely and properly recycle any electronic equipment.

Transportation

Employee Commute

At SOL VISTA, we encourage all team members to take environmentally friendly methods of transportation to and from our office as well as to and from on-site meetings and other events. Currently, over one-half of office-based team members either walk, bike, or take sustainable transit to the office. Additionally, one-third of our team members live within 2 miles of our Silver Spring, MD office. Our office is located just 3 blocks from a WMATA metro stop and many of our partners commute to our headquarters using public transportation.

Efficient Business Travel

While traveling on business, SOL VISTA encourages its team members to observe the following energy-efficient procedures:

- *Booking of green hotels (using our Green Hotels Database: <http://www.solvista.com/green-hotels.html>)*
- *Travel to and from business locations using sustainable transit options*
- *Combining more than one site visit into one trip if the locations are close by, thereby reducing gallons of fuel needed.*

SOL VISTA has also invested in a Polycom teleconference system and webcams that allows our team members to virtually communicate with property and facility staff across the country and offer them energy efficiency solutions without requiring on-site travel. This technology alone saves huge amounts of energy, gasoline, and travel miles, resulting in notable reductions of carbon dioxide and other greenhouse gas emissions.

Environmental Certifications, Awards and Other Activities

- SOL VISTA is allied closely with environmental organizations such as the American Hotel & Lodging Association (AH&LA) Sustainability Committee, Association of Energy Engineers (AEE), U.S. Green Building Council (USGBC) and ENERGY STAR. SOL VISTA believes businesses benefit financially by continually improving their management of energy resources, and the environment benefits from reduced levels of related pollution. We are proud to offer services and*

products that can assist businesses who have committed to the goals of ENERGY STAR.

SOL VISTA has received the following awards for its commitment to sustainability and energy efficiency services:

- *2017 Bethesda Green Awards Honoree for “Innovation Award for Small Business”*
- *2014 Incubator Company of the Year for Maryland, Energy and Environment Category*
- *2013 Incubator Company of the Year for Montgomery County, MD*
- *U.S. Department of Energy Better Buildings Challenge Showcase Property for Hotel Monaco DC:*
