Management and Leadership

Environmental Policy Statement

"St. Paul's Lutheran School is committed to reducing its impact on the environment. We will strive to improve our environmental performance over time and to initiate additional projects and activities that will further reduce our impacts on the environment. As a Christian education institution, we are obligated to take care of God's creation and treat others as they would want to be treated. Additionally, the cost savings associated with a green culture will result in better stewardship of the Church's financial resources."

Waste

Solid Waste Reduction and Reuse

Office staff is continually working toward a 'paper-reduced' system by now sending newsletter updates via e-mail instead of hard copy prints.

Recycling

The school has acquired a dumpster for single-sort recyclables which is more convenient than curbside collection and has increased our recycling rate. Paper waste is collected on-site and recycled through Abitibi Paper Retriever.

Energy

Energy Efficiency

St. Paul's is in the process of replacing all of our lighting with LED bulbs and fixtures. We have completed the lighting fixture replacement of the Parish Hall main lights, the elementary school hall and several exterior wall packs. Thanks to the generous rebates provided through BGE, we estimate that our electric bill will be reduced by 50% when the full LED upgrade is complete.

We will also soon be replacing five almost 30 year old air conditioning units with more energy efficient 16 SEER units.

Transportation

Efficient Business Travel

School field trips utilize bus travel for large groups and parent carpool for small groups.

Profile Updated September 2017

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
