Management and Leadership

Environmental Policy Statement

SuperFun Eco Tours strives to bridge the gap between us and nature through low impact professionally guided eco tours. We are dedicated to enhancing the recreational, natural, and cultural landscape considering both an environmentally conscience and developmentally sustainable model. Our team loves and lives through nature while they teach, share, interpret, and promote stewardship of natural areas. We endeavor to provide clients with an unforgettable natural experience.

Environmental Team

Our environmental team consists of Tom Simon, Dale Barber, and Neil Nimrichter. The team meets on a weekly basis and is constantly looking for new ways to better our company's positive environmental impact. Our environmental team heads up our recycling program, waste management, and sustainable business practices.

Annual Environmental Goals

Our environmental team sets annual environmental goals. Our current environmental goals are to develop and maintain a working recycling and waste management program, cut down on all paper products and energy waste, utilize biodiesel in all company vehicles, and educate the public about our constant environmental impact.

Environmentally Preferable Products and Services

The trips and tours that are provided by SuperFun Eco Tours are held to a strict, "leave no trace" policy. This ensures that our impact is kept at a minimum as we educate the public about the local eco-systems.

Waste

Solid Waste Reduction

We have been able to reduce paper waste by using e-mail and the internet. We also reuse shipping waste whenever possible.

Recycling

SuperFun Eco Tours has a comprehensive recycling program that covers every aspect of the business. All office paper, cardboard, plastic and other office waste is recycled. Between our paper reduction and recycling efforts, we think that we can virtually eliminate the majority of our paper waste. With all our recycling policies we expect to recycle close to 350 pounds of waste this year.

Transportation

Fleet Vehicles

All company owned vehicles will be and are run on diesel fuel. All company vehicles will be and are fueled using 100% biodiesel or a biodiesel blend.

Profile Updated March 2011

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
