Management and Leadership

Environmental Policy Statement

The ANA Group, LLC is committed to reducing its impact on the environment. We are committed to complying with all applicable environmental regulations, preventing pollution by striving to minimize waste generation and resource consumption, and to communicate our environmental commitment to our team, clients, and our community. We will work to improve our environmental performance over time by adding additional business practices that will further reduce our impacts on the environment.

Environmentally Preferable Products and Services

I have purchased an Energy Star multi function printer/copier/fax and I purchase green office supplies such as FSC certified paper, envelopes etc. I also use Ecosign software which allows documents to be signed by one or more parties via an emailed pdf and then once executed, emails a copy to each signer for their records. This reduces paper usage as well as the transportation costs and impacts that were associated with collecting signatures.

Waste

Recycling

About 780 lbs of paper, cardboard, plastic, metal, glass, and batteries are collected annually for recycling. In addition, larger items such as furniture are also recycled.

Energy

Energy Efficiency

Compact fluorescent bulbs, a programmable thermostat, and Energy Star AC units are used. We have also replaced an old hot water heater with an energy efficient model and its temperature is kept below 120 degrees to further increase energy efficiency.

Renewable Energy

I am very proud to say that I switched to 100% wind power 1 year ago, through Clean Currents. There was a slight cost savings but of course the best reward is knowing that my home business is using renewable energy.

Transportation

Employee Commute

The ANA Group, LLC is a home-based business so there are no employee commute miles.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
