Toyota / Scion	\$10.00 / 24+ hr.
Volkswagen	By document, not time
Volvo	\$49.50 / 72 hr.

The U.S. Environmental Protection Agency requires Original Equipment Manufacturers (OEMs) to make full text emissions-related service information and training information available to persons engaged in the repair and maintenance of motor vehicles or engines. All of the major OEMs have information available via the World Wide Web. If you are interested in reading the EPA rule, go to <http://www.epa.gov/otaq/vehserv.htm>.

If your shop sees a variety of vehicles and needs OEM information for repairs, a good alternative to buying full access to the OEM web sites is to purchase short-term access. If you have the flexibility, you can save time and money by looking up all of your problems at once and printing the information you need.

The chart at the left is an illustration of short-term access costs from January 2005. There are other terms available like monthly and yearly access as well. For complete and up-to-date information, go to <http://www.nastf.org/>. This website includes links to the OEMs and other useful information.
