

HONOR ROLL

School Idle Reduction

Congratulations to these schools and green centers that have set up a vehicle idling policy!
They are making great strides to keep students, staff and families safer by reducing vehicle emissions from unnecessary idling.

Idling cars and buses can:

- pollute the air in and around the vehicle and school buildings
- waste fuel and money
- cause engine wear and damage

Ready to sign up? It's free and easy. Just email mde.idlefree@maryland.gov to receive your own idling program materials.
