

Maryland Delegate The Honorable Regina T. Boyce

Regina was born in Washington, D.C. to Caribbean parents who emigrated to the United States from Jamaica and Barbados. She received her Bachelors in Kinesiology and Psychology from Towson University, and holds a Masters in Public Administration from the University of Baltimore.

Regina was elected Delegate in the 43rd district in 2018 where she serves on the Environment & Transportation Committee, and is assigned to the Environment and Motor Vehicle & Transportation subcommittees.

Regina enjoys the choices she has to move in and around the city, whether by biking, walking, using mass transit or driving, and works so that everyone too has these choices. She believes that transportation options are important for the stability and growth of any city, and that we only have one earth that we must care for and protect along with the people on it.
