RE: Proposed Discontinuation of Bottled Water Delivery Program
Inactive Exxon Facility #28077
14258 Jarrettsville Pike
Phoenix, Maryland
Case Number 2006-0303-BA2
Facility I.D. No. 12342

Dear Mr. Ralston

As you are aware, since 2006, ExxonMobil Corporation (ExxonMobil) has been conducting remediation activity in response to the discovery of a release from the underground storage tank system at the former Exxon service station on Jarrettsville Pike. As a precautionary measure, ExxonMobil initiated delivery of bottled water to residences and businesses in the area. While MDE did not require ExxonMobil to provide bottled water, the Department has requested the opportunity to review and approve the discontinuation of the bottled water program.

Currently more than 130 properties receive bottled water from ExxonMobil. A history of bottled water deliveries was presented in the "Proposed Modifications to Bottled Water Delivery and Private Supply Well Sampling Programs" submitted to the MDE on January 15, 2010 and initially approved by the Department on February 1, 2010.

Based on the overall investigation and supported by private supply well analytical results, ExxonMobil proposes to discontinue all bottled water deliveries. **Table 1** lists all properties currently receiving bottled water from ExxonMobil.

All properties receiving bottled water deliveries from ExxonMobil have sampling results below MDE action levels for gasoline constituents (with one exception, discussed below). Summary tables showing analytical results for BTEX (benzene, toluene, ethylbenzene, xylene),

naphthalene and five fuel oxygenates, including MTBE, for PSW samples collected since January 1, 2013 at all properties receiving bottled water are included as **Attachment 1**.

Only 3627A Southside Avenue has had influent detections above the MDE action levels for MTBE in drinking water since January 2013. This property owner has been provided with a Point of Entry Treatment System. Likewise, all PSWs within the study area that have ever exceeded MDE action levels for gasoline constituents have a Point of Entry Treatment (POET) system installed and maintained by ExxonMobil. Of these, only 3627A Southside Avenue currently receives bottled water. Given the evidence the POET system is working as designed for the removal of MTBE, bottled water delivery to this property is also proposed for elimination.

With MDE's approval, ExxonMobil will provide written notification to those property owners listed on **Table 1** in advance of its discontinuing delivery of bottled water. A draft letter to residents informing them of the cessation of bottled water delivery can be found as **Attachment 2**. A draft letter to the resident at 3627A Southside Avenue can be found as **Attachment 2A**.

ExxonMobil continues to work with the MDE to investigate and monitor any changes in the nature, extent and distribution of gasoline contamination in the area, including an evaluation of whether any individual wells may potentially be impacted by gasoline constituents above the MDE's state action levels. If in the future, ExxonMobil or the MDE believes that a PSW will be impacted by gasoline constituents above the MDE's action levels, ExxonMobil will resume bottled water delivery service or install a POET system at the direction and with the approval of the MDE.

Please feel free to contact the undersigned with any questions or comments.

Sincerely,

KLEINFELDER

Mark J. Schaaf, CPG

NOTES:

DIPE - Di-Isopropyl ether
 ETBE - Ethyl tert Butyl Ether
 J - indicates an estimated value
 MTBE - Methyl Tertiary Butyl Ether
 ND(0.50) - Not detected at or above the laboratory reporting limit, laboratory reporting limit included
 PI - Influent sample location. POET maintained by ExxonMobil.

PIO - Influent sample location. POET maintained by Others.
 PM - Mid-Fluent sample location. POET maintained by ExxonMobil.
 PMO - Mid-Fluent sample location. POET maintained by Others.
 PE - Effluent sample location. POET maintained by ExxonMobil.
 PEO - Effluent sample location. POET maintained by Others.
 POET - Point of Entry Treatment system
 TAME - tert-Amyl Methyl Ether
 TBA - Tertiary Butyl Alcohol
 µg/L - micrograms per liter

DRAFT NOTIFICATION LETTER TO RESIDENTS

DATE

Name
Address

For the past several years, Kleinfelder, on behalf of ExxonMobil, has been sampling your drinking water as part of a groundwater investigation conducted in cooperation with the Maryland Department of the Environment (MDE). During this time, ExxonMobil has supplied your household with bottled water, which was originally provided as a precautionary measure.

Historical sampling data for the drinking water at your property show that your private supply well water meets the applicable MDE standards. Additionally, the extensive groundwater investigation supports the conclusion your well will not be impacted in the future by gasoline constituents, including MTBE, above the MDE standards.

As you may know, the MDE action level for MTBE is 20 ppb. A summary of the MTBE laboratory results for your drinking water well is presented in the attached table. As a result of these findings, the MDE has determined there is no need for ExxonMobil to continue to supply your home with bottled water as a precautionary measure. You will receive your final water delivery between date and date.

We appreciate your patience as we have worked diligently to ensure the safety of our neighbors in the Jacksonville community who were affected by the 2006 leak. If you have any additional questions regarding the investigation, please contact ExxonMobil at [#TBD].

Mr. Frederick Craig

Phoenix, MD 21131-1734

As you know, for the past several years, Kleinfelder, on behalf of ExxonMobil, has been sampling your drinking water as part of a groundwater investigation conducted in cooperation with the Maryland Department of the Environment (MDE). During this time, ExxonMobil has supplied your household with bottled water, which was originally provided as a precautionary measure.

It has been more than nine years since a gasoline release was discovered at the former Exxon service station on Jarrettsville Pike and the investigation and remediation began. Sampling results have demonstrated that remediation is successfully cleaning up the contamination and has significantly improved groundwater conditions. In cooperation with MDE we installed a point of entry treatment (POET) system at your property. This POET system is functioning properly for the removal of MTBE and will remain in place at this time. ExxonMobil will continue its operation, sampling and maintenance of your POET system.

The MDE has determined there is no need for ExxonMobil to continue to supply your home with bottled water as a precautionary measure. You will receive your final water delivery between date and date.

We appreciate your patience as we have worked diligently to ensure the safety of our neighbors in the Jacksonville community who were affected by the 2006 leak. If you have any additional questions regarding the investigation, please contact ExxonMobil at [#TBD].
