COMAR 26.10.OIL POLLUTION CONTROL & STORAGE TANK MANAGEMENT

The Maryland Department of the Environment (MDE) would like to notify the public of an opportunity for interested parties to review and comment on a draft proposal to amend Code of Maryland Regulations (COMAR) by adopting new regulations under **COMAR 26.10 Oil Pollution Control and Storage Tank Management**. The draft regulatory proposal is expected to affect small businesses that:

- Retail motor fuel;
- Own and operate a motor fuel dispensing facility;
- Own and operate a service station for vehicles or vessels;
- Own and operate an oil aboveground and/or underground storage tank system;
- Own and operate a hazardous substance underground storage tank system;
- Own and operate an emergency power generator UST system;
- Offer a State of Maryland approved training program for UST system operators;
- Train and certify UST system technicians, removers, and inspectors;
- Employ certified Class A, Class B, and Class C Operators;
- Employ certified UST system technicians, removers, and inspectors;
- Install, maintain, repair, and close residential heating oil tanks;
- Perform environmental services such as testing and sampling of monitoring wells and petroleum products and by-products; or
- Participate in any combination of the above activities.

Public comments on the draft regulatory proposal will be accepted by MDE through November 2, 2021.

Please use the QR codes on the front to download the relevant documents associated with this comment period.
