Maryland Department of the Environment

Volume V, No. 12

April 2002

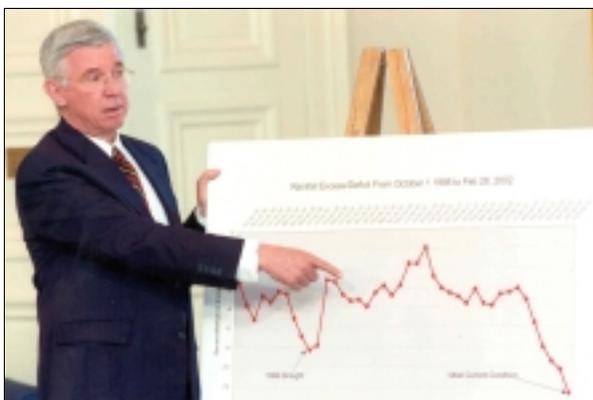

## Drought emergency imminent in central Md.

Gov. Parris N. Glendening — announcing March 18 that all of Maryland remains in drought warning, drought watch or imminent drought emergency status — urged Marylanders to continue voluntary measures to conserve water. Level One mandatory restrictions remain imminent for the Central Maryland region but were postponed as rain continues to be forecast.

Central Maryland, which consists of Cecil, Carroll, Harford, Howard and Frederick counties, as well as both Baltimore City and Baltimore County, portions of northwestern Montgomery County that are not served by the Washington Suburban Sanitary Commission (WSSC), and portions of northern Anne Arundel County served by Baltimore City, remain in an impending emergency condition.

“We still anticipate declaring drought emergency for Central Maryland unless the rain continues for much longer than predicted, and it will not be the only region to fall into emergency status if we do not take immediate steps to conserve water,” Governor Glendening said. “We are calling on all businesses and citizens across the state to take voluntary steps to achieve a ten percent reduction in total water usage. We must all work together as Marylanders to overcome this challenge now and in the future.”

Because Level One mandatory restrictions primarily

## New gas cans are part of portable fuel container rule

By Reider J. White and Eddie DuRant

In an effort to help the state reduce ozone levels, the Maryland Department of the Environment (MDE), along with several northeastern states and the assistance of the Ozone Transport Commission (OTC) has recently developed the Portable Fuel Container Spillage Control Rule.

Portable fuel containers are used to refuel a wide range of small off-road equipment such as lawnmowers, chainsaws and engines such as those found on marine pleasure craft and in recreational vehicles. In many instances, refueling this equipment results in gasoline spillage when the receiving tank is overfilled, or from improper handling. As a result, volatile organic compounds (VOCs) are emitted into the environment.

Other contributing sources of emissions stem from evaporation, refueling spillage, poor transportation and storage procedures and permeation of vapors through the portable fuel container itself. This amounts to a significant amount of VOC emissions per day in the state of Maryland, which contribute to the formation of ground-level ozone.

“The new rule, designed to reduce VOC emissions caused by the use of portable gas containers, is an example of the need for Maryland to focus its air pollution re-

## PerkinElmer Fluid Sciences earns monthly honor

By Laura Armstrong

PerkinElmer Fluid Sciences, located in Beltsville, supplies sealing and fluid containment systems for the aerospace, semiconductor, medical and power generation industries. These products enable their customers to achieve high performance objectives with environmental benefits such as increased fuel efficiency and emissions containment in jet engines.

PerkinElmer has succeeded in reducing its hazardous waste generation, and energy and water usage through a number of process and equipment changes. For example, when rebuilding a metal plating shop in 1999, the company improved the shop layout to reduce drag out, installed triple rinses and added an ion-exchange system to recover drag-out solution. These changes have extended bath life and reduced wastewater treatment sludge from one barrel a day to one to two barrels per month.

Company officials also discovered that they were able to meet their customers' product specifications by burnishing certain products rather than electro polishing. Burnishing produces almost no waste and the elimination of the electro polishing process allowed the company to drop from large quantity generator status to small quantity hazardous waste generator status. PerkinElmer has also replaced all of its solvent degreasers with aqueous cleaners — a switch that has reduced waste by three tons per year, at a cost savings of \$3,000 per year.

The facility recycles 95 tons of cardboard and paper and a quarter of a million pounds of scrap metal a year. The use of new machinery, however, that modifies the shape of the metal before cutting has increased their efficiency and reduced scrap metal by 9 percent even while production rates go up.

In the area of water conservation, the

MDEnvironment PHOTO BY LAURA ARMSTRONG

**Daniel Rettig**, EH&S Manager, Beltsville Site, **Kevin Wayment**, Vice President & General Manager, Beltsville Site, **Keith Rosentiel**, Division EH&S Director, and **Bob Barrett**, Division President, PerkinElmer Fluid Sciences.

use of flow restrictors and minor process changes have allowed the facility to cut water consumption by more than half (from 9 million to 4 million gallons per year.)

PerkinElmer's energy efficiency measures include the use of energy efficient

T-80 fluorescent bulbs with reflectors, motion detector sensors to turn off lights when rooms are not in use, high-intensity lighting in the shop floor area and tinted windows and window blinds. These retrofits have paid for themselves and are saving the company 3 percent annually in energy costs. The company has a number of other energy conservation measures they will be pursuing in the next few years including updates to their heating, ventilation and air conditioning system.

Employees receive training in hazardous waste management, stormwater management and spill prevention. The company encourages efficiency improvements through its gain-sharing program and is also looking to expand their employee rec-

ognition program for environmental performance.

PerkinElmer is currently participating in an environmental management-training program sponsored by the Maryland Department of the Environment and the Maryland Technology Extension Service. This program assists businesses in the implementation of Environmental Management Systems (EMSs) based on the ISO 14001 global standard.

Thank you to PerkinElmer for their participation in this EMS project and for their membership in *Businesses for the Bay* since 1999. Keep up the good work!

For more information on *Businesses for the Bay*, a free, voluntary pollution prevention recognition program for organizations located in the Chesapeake Bay watershed, contact Laura Armstrong at MDE (800) 633-6101, extension 4119, or Mary Lynn Wilhere at *Businesses for the Bay*, 1-800-968-7229, ext. 719. Businesses may also sign up for the program online at [www.b4bay.org](http://www.b4bay.org).

## News Briefs

### Court unholds EPA air rule

A federal appeals court gave the Environmental Protection Agency the final go-ahead March 26 to issue more stringent air quality health standards after a five-year legal fight that went all the way to the Supreme Court.

A three-judge panel of the U.S. Court of Appeals rejected claims the EPA had acted arbitrarily in setting the new standards. The Supreme Court ruled a year ago that under the Clean Air Act the EPA had no requirement to take into account costs when issuing health standards and had acted reasonably in trying to protect certain groups, including small children, the elderly and people with respiratory problems.

Originally introduced in 1997, the standards limits ozone, a major component of smog, to 0.08 parts per million instead of 0.12 parts per million under the old requirement. It also changed

the monitoring period from 12 hours to eight hours to better reflect actual air quality. States and local authorities also were required to limit microscopic soot from power plants, cars and other sources down to 2.5 microns in diameter, or one-28th the width of a human hair.

The ruling would aid Maryland in its longstanding struggle to reduce a severe smog problem because much of the pollution in the state's air is carried by winds from the Midwest.

The changes in the EPA's air quality standards have been in limbo because of the court challenges waged by the American Trucking Associations, the U.S. Chamber of Commerce, the National Association of Manufacturers, and the states of Michigan, Ohio and West Virginia.

### Potomac, tributaries reopen to shellfishing

The Maryland Department of the Environment (MDE) reopened the lower Potomac River

and its Maryland tributaries to shellfish harvesting on March 14. The waters had been temporarily closed since February 16 as a precaution due to high concentrations of *Dinophysis acuminata*, a potentially harmful algae that can produce a toxin harmful to humans.

Toxicity tests conducted by the Food and Drug Administration on algae samples showed the presence of trace amounts of the algae's toxin, okadaic acid. This toxin can accumulate in oysters and, if ingested, cause diarrhetic shellfish poisoning. To determine potential health threats, the FDA conducted additional tests of oyster meats sampled from areas with the highest concentrations of algae. The samples showed only trace amounts of toxin from the algae, far below public health standards associated with shellfish borne disease. This new information allowed MDE to reopen the restricted waters.

# MDE leads the way with Earth Day events

By Tracy Newman

As groups across the nation mark Earth Day — an annual day designed to address environmental issues and to highlight what can be done to preserve the environment through various events — the Maryland Department of the Environment (MDE) will show its dedication to the state's natural resources through a slew of events in and around the city of Baltimore.

"While much of our work to preserve Maryland's land, waterways and air quality is behind the scenes, we take Earth Day as an opportunity to demonstrate our dedication to the environment and to the state of Maryland," said MDE Secretary Jane Nishida.

MDE will begin its celebration of Earth Day with a ceremony at the state agency's new home at Montgomery Park Business Center. Nishida will join a few MDE employees to help plant the first seedlings on the building's green roof, which offers an ecological alternative to storm water runoff management and helps to reduce pollution input into receiving waters.

After the planting, MDE employees will head across the street to Carroll Park for a walk through and cleanup of the park.

"Baltimore City will be supplying gloves, trash bags and guidance for the cleanup," said Don Mauldin, MDE's events coordinator. "This is a fantastic way to celebrate the one day of the year considered synonymous with the goals we strive to achieve every day at MDE. It will also let our new neighbors know, what the state agency can contribute their community."

The Mount Clare Museum House in the park will be also opened for tours during the MDE cleanup. Get a glimpse into the past, as you are walked through the museum by guides dressed in period costumes.

Following the cleanup at Carroll Park, MDE's Deputy Secretary Merrylin Zaw-Mon will be heading to Harford Community College to participate in an Earth Day tree planting on campus at 1 pm.

"The agency will be giving away 500 seedlings at the college to the students and faculty. It's MDE's way of letting the public know that celebrating Earth Day 2002 is not limited to trash cleanups and recycling," Mauldin said.

Other Earth 2002 events include:

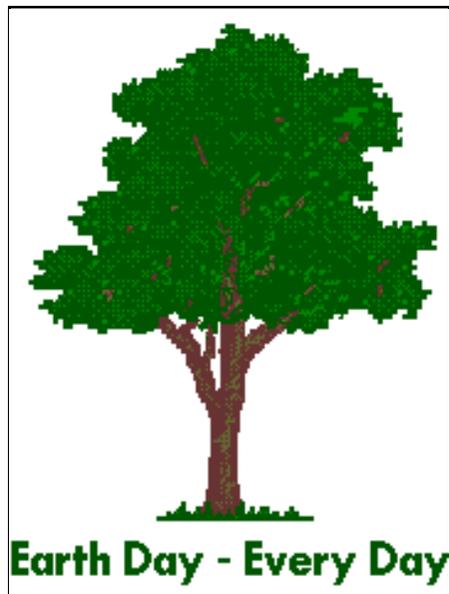

PHOTO COURTESY OF WWW.KIDSDOMAIN.COM

- Celebrate Earth Day with The Loading Dock! Come and listen to music, and enjoy the food, hands-on workshops, and informational displays April 20 from 9 a.m. to 2 p.m. at 2523 Gwynns Falls Pkwy Baltimore. The Loading Dock, Inc., processes and distributes reusable building materials through a 21,000 sq. ft. warehouse. The Loading Dock is a 501(c)3 nonprofit organization with a mission to increase decent affordable housing for Maryland's low income families through redistributing surplus building materials. TLD operates out of a 21,000 sq. ft. warehouse in northwest Baltimore and serves as the state's central clearinghouse for salvaged surplus building materials that are otherwise headed for state landfills and redistributes them.

- The Herring Run Watershed Association will sponsor its Herring Run Spring Fest, a community celebration in cooperation with local neighborhoods will engage 3000-5000 people in enviro-ed, music, art, play, food and drink and hands-on projects such as tree plantings, habitat assesment and water sampling. The event will be held April 27 from 10 a.m. to 4 p.m. on Belair Road (US 1) at Shannon Drive (Herring Run Park). Call 410-254-1577 for more information.

- Become a conservation crusader on April 21 from 11 a.m. to 3 p.m. in celebration of Earth Day 2002. Join a clean-up team to improve Discovery Creek's trails and Minnehaha Creek, make an eco-friendly craft, meet animals that help the environment, and visit the Conservation Corner for earth-sav-

ing activities and ideas. The event will be held at 7300 MacArthur Blvd. in Glen Echo. For directions to this event, call the museum at (202) 364-3111.

- Join the Oyster Tagging Dive, the oyster monitoring and tagging project between midshipmen from the US Naval Academy (USNA) and volunteers from Magothy River Association, Anne Arundel Community College (AACC) and National Oceanic and Atmospheric Administration (NOAA). This project has both an educational and restoration component. The project will be located at the new Chest Neck Point reef site in the Magothy River, Severna Park. The event, sponsored by The Magothy River Association, will take place April 20 from 9 a.m. to 1p.m. For Thanks for your interest. For more information about this cleanup/restoration project please call at 410-647-8772.

- The Montgomery County Green Party will sponsor a multicultural Earth Day celebration of Jesup Blair Park in Silver Spring and its Grove of Ancient Oak Trees. The celebration will include a concert by the folk Group Magpie, parade of All Species and All Nations, and an Adopt-a-Tree ritual. The event will take place April 28 from 11 a.m. to 4 p.m. For more information about the event call (301)933-1210.

- Join the Howard County Conservancy as they celebrate Earth Day at Mt. Pleasant! Choose from tree planting, trail maintenance, invasive plant control, and much more. Service projects will take place from 1-4 pm. Stay from 4-4:30 pm for refreshments and activities for children. Registration is required by April 6. Please call 410-465-8877, or email <hcconservancy@accessa.net> for more information and to register. (Rain date is April 21.)

- The Arundel Sand & Gravel Company at 938 Quarry Road (enter via Baker Road) in Havre de Grace will hold an Earth Day open house April 27 from 12 to 4 p.m. The event, which will be held rain or shine, is scheduled to include food and entertainment, children's activities, a tour of the quarry, a tour of tug boats and displays and demonstrations. Weather Permitting, a rock blast will be held toward the end of the event at 4 p.m. For more information or to make reservations, call (410) 939-9225 or (410) 575-6587.

## Ask

By Andrew Gosden

This column is focused on questions concerning business environmental compliance issues. Since many questions may require more space than is available to answer fully, these answers will often provide contact information for more detailed information. Please submit questions to Maryland Department of the Environment, EPSC – Ask MDE, 2500 Broening Highway, Baltimore, Md. 21224. E-mail any questions to EPSC@mde.state.md.us, with Ask MDE in the subject line. It is not necessary to identify yourself or your business. Questions that are of general interest will be answered in this column.

**Q. My business stores raw materials in containers outside. Do I need to be concerned about rainwater that may come into contact with these containers?**

A. Yes. The Environmental Protection Agency (EPA) issued regulations in 1990 that require discharge permits for storm water associated with industrial activities.

These regulations identify the types of businesses that must apply for coverage under the storm water program by their Standard Industrial Classification (SIC) Code. The activities include most manufacturing and mining operations as well service activities and construction. The Maryland Department of the Environment (MDE) has developed a General Industrial Storm Water Permit. This permit is designed for businesses that have no water discharges besides storm water.

If the business is located in one of the SIC codes that requires coverage, they submit either a Notice of Intent (NOI) form or a No Exposure Certification form. The No Exposure Certification form is only used if the business does not have any processes that could potentially contaminate storm water. MDE has a checklist you can use to determine if the No Exposure Certification is appropriate for the business.

This general permit requires a business owner to develop and implement a storm water pollution prevention plan. The plan will need to include assessment of the site for drainage patterns and potential sources of pollutants.

Take steps to control the potential sources of pollutants, assign a responsible person and annually evaluate the effectiveness of the plan. The EPA Region III office in Philadelphia has developed sample plans for seven industries

See ASK, Page 5

## Ballast water regs published, comments being accepted

The Maryland Department of the Environment (MDE) would like to announce the publication of Maryland's new ballast water regulations in the April 5, 2002 edition of the Maryland Register. The first day of publication will mark the beginning of a 30-day public comment period. Comments may be mailed to Deanna L. Miles-Brown, Regulations Coordinator, 2500 Broening Highway, Baltimore, Md. 21224 or faxed to (410) 631-3873. Comments will be accepted until the close of business on May 7. The Maryland Register can be accessed from

the Maryland Division of State Documents website at <http://www.dsd.state.md.us> or at local libraries.

MDE will hold a hearing concerning the adoption of these regulations on May 6, at 10 a.m. at MDE, 2500 Broening Highway, Baltimore, Md. 21224. All interested persons are invited to attend and state their views. Any hearing impaired person may request an interpreter at the hearing by giving five working days notice to Deanna L. Miles-Brown at (410) 631-3173.

Maryland's regulations incorporate the ex-

isting federal ballast water regulations with the addition of guidelines for vessels on coastwise voyages and penalties for non-compliance. Under Maryland's regulations, qualifying vessels are asked to adopt voluntary ballast water management practices, and submit a mandatory ballast water reporting form or a voluntary exemption claim, as appropriate. Implementation of these regulations is scheduled for July 2002. For more details, please visit MDE's Web site at [www.mde.state.md.us](http://www.mde.state.md.us) or contact Karen Eason at [keason@mde.state.md.us](mailto:keason@mde.state.md.us).

# Leonardtown Wharf brownfield site offers promise

By Darshana Patel and Richelle Hanson

St. Mary's County recently took advantage of the Maryland Department of the Environment's (MDE) Brownfields Site Assessment Initiative as a means of expanding their efforts to revitalize a waterfront property.

"The assessment initiative through MDE has greatly enhanced the prospects of future development of the Leonardtown Wharf property in downtown Leonardtown," said Leonardtown Administrator Laschelle Miller. "This site is a key to the continued success of the downtown area. The potential for this waterfront development is unlimited."

MDE's Brownfields Site Assessment Initiative, a program funded by the federal government, helps put brownfields back into productive use, is designed to help eligible property owners or prospective property owners of brownfields determine the extent and type of contamination on their property at no cost. Brownfields are abandoned or underutilized industrial or commercial sites, located primarily in urban areas, that are either contaminated or perceived to be contaminated.

Single-family residences and Leonardtown's commercial center surround the Leonardtown Wharf site, a five-acre parcel of land situated on Breton Bay and bi-sected by Washington Street.

County officials and a cooperative busi-

MDENVIRONMENT FILE PHOTO

**St. Mary's County is taking advantage of Maryland Smart Growth programs to revitalize the Leonardtown Wharf property, shown above. Plans for re-development of the parcel are on-going.**

ness community started taking advantage of Maryland's Smart Growth programs to create a thriving downtown when the area became overloaded with abandoned, run-down buildings.

In spite of the revitalization of the area, the waterfront site was difficult to market and sell for development because the environmental concerns of the property were

unknown. In 2001, St. Mary's County considered purchasing the property and performed a Phase I environmental study. This study and previous investigations on the site suggested surface and subsurface soil contamination, contamination from a previous on-site oil delivery business and groundwater contamination.

Under a cooperative agreement with the

Environmental Protection Agency (EPA), MDE's Environmental Restoration and Remediation Program conducted a brownfields assessment of the site in July 2001. Site samples revealed low level gasoline contamination of the surface soil and shallow groundwater.

Under the assessment initiative, MDE issues a report with recommendations based on the results of the assessment. In regards to the Leonardtown Wharf site, MDE issued a letter recommending a deed restriction on groundwater use and addressing certain surface soil contamination prior to development. In the event that contamination is contained on-site, MDE recommends an additional deed restriction indicating that the property may not be used for residential purposes.

"MDE staff has been extremely cooperative and informative in this project," Miller added.

Leonardtown's Commissioners and site developers are considering the future plans for the waterfront property. There are many opportunities to consider since the site is adjacent to a new hotel/conference center and golf course project. Recently, Leonardtown received a Community Legacy Grant to remove dilapidated buildings on the site and discussions have begun with MDE to address identified environmental issues through the Voluntary Cleanup Program.

## MDE initiates Baltimore Harbor TMDL stakeholder advisory group

By Scott Macomber

Recognizing the importance of full and early public involvement in the state's water quality protection initiatives and the unique issues associated with the Baltimore Harbor, the Maryland Department of the Environment (MDE) has invited a wide variety of representatives from interested organizations into the formative stages of a major program dealing with the Baltimore Harbor.

MDE hosted the first meeting of the Baltimore Harbor Total Maximum Daily Load (TMDL) Stakeholder Advisory Group on Feb. 6 at the Tide Point offices of Struever Brothers Eccles and Rouse.

Approximately 50 people representing local business and industry, academia, local and regional environmental organizations, and federal, state and local governments attended the meeting.

The Stakeholder Advisory Group (SAG) was established by MDE in response to local stakeholders' concerns and in recognition by the department that early planning and preparation would be helpful in this case both to the business community and to the

many public and private interests who have historical interests in the harbor's development and protection.

"This unique outreach initiative was precipitated by the Department's commitment to provide stakeholders with full and early involvement in Maryland's TMDL development efforts," said Steve Bieber, chief of Environmental Planning and Outreach Division for MDE's Technical and Regulatory Services Administration

The mission of the SAG is to provide a forum for stakeholders to review, discuss and make recommendations to MDE on the technical, scientific, public health, economic and public policy issues surrounding the development of the harbor TMDLs.

A TMDL establishes the maximum amount of an impairing substance or stressor that a waterbody can assimilate and still meet water quality standards and allocates that load among pollution contributors.

MDE is presently developing TMDLs on the toxic substances chromium, zinc and lead, and the nutrients, nitrogen and phosphorus for various impaired segments of the harbor. The TMDL process includes collecting and

analyzing environmental data, developing ecosystem simulation models, estimating pollutant load allocations, soliciting public review and comment and submitting a final document to the Environmental Protection Agency (EPA) for approval.

"MDE has collected and analyzed a majority of the environmental data needed for TMDL development, and is presently developing computer models to estimate pollutant load allocations for the harbor," Bieber said. "It is expected that the development of load allocations through model simulation runs will occur in late 2002 and early 2003. Further public review and comment will occur before the TMDLs are submitted to EPA for review and approval in December 2003."

The initial meeting served as a foundation building process that updated stakeholders on the current status of Maryland's TMDL process.

Presentations were given on the Clean Water Act, Section 303(d) list of impaired waters (the legal mechanism that requires TMDLs to be completed) and the environmental monitoring and modeling effort being brought to bear on the complicated Baltimore Harbor

ecosystem.

Attendees voiced concerns on a variety of issues regarding the TMDL process, including: impacts on public health, impacts on dredging operations in the harbor, data quality and quantity, impairment types and implications and geographical scale.

The department anticipates that the stakeholder advisory group will meet on a quarterly basis throughout the remainder of the Baltimore Harbor TMDL process, according to Bieber.

The next meeting of the SAG is scheduled for May 7, at the Living Classrooms Foundation in Baltimore. For more information on the stakeholder advisory group (<http://www.mde.state.md.us/tmdl/bhsag/bhsag.html>) or if you would like to attend the next meeting, please contact MDE's Scott Macomber at (410) 631-3077 or [smacomber@mde.state.md.us](mailto:smacomber@mde.state.md.us).

**Get all the information  
you need about the  
state at:  
[www.maryland.gov](http://www.maryland.gov)**

## MDE issues small business compliance loan

MDENVIRONMENT PHOTO BY TRACY NEWMAN

From right to left, Ki S. Kang, the owner of Kang's Cleaners Inc., Maryland Department of the Environment (MDE) Assistant Attorney General Helen Akparanta, Stanley Tsai from MDE's Environmental Permit Service Center and Sung Kook Chun, attorney for Kang's Cleaners, at the closing settlement of the first Small Business Pollution Compliance Loan in the amount of \$50,000 for the upgrade of dry-cleaning equipment that reduces both hazardous air pollutant (HAP) and volatile organic compound (VOC) emissions.

## ASK

Continued from Page 3

including auto salvage yards, marinas, and transportation facilities. These sample plans can be viewed at: [www.epa.gov/reg3wapd/stormwater](http://www.epa.gov/reg3wapd/stormwater).

There is a \$550 fee for coverage under the general permit. The fee covers the period from the time the NOI is submitted until the general permit expires. The fee is adjusted based on the time left on the permit for start-up facilities. There is no fee for filing the No Exposure Certification form. To get details about the permit and how it may apply at a specific facility please contact MDE's Industrial Discharge Permits Division at (800) 633-6101, extension 3323. You can download copies of the forms mentioned in this column at: [www.mde.state.md.us/epsc/wmapermit.html](http://www.mde.state.md.us/epsc/wmapermit.html).

Although the information provided in this column is generally accurate for the specific situations that are addressed, it is not a substitute for compliance with any requirements.

Due to the complex nature of environmental regulations, you should call the Maryland Department of the Environment through the Environmental Permits Service Center if you have any questions about your permit or how the regulations may apply to your situation.

## CAN

Continued from Page 1

duction efforts beyond industry and vehicles to very small sources of ozone-forming pollutants in order to allow Maryland to achieve its clean air goals," said Angelo Bianca of MDE's Air and Radiation Management Administration. "The estimated benefits derived from the proposed rule would be a reduction of two tons per day of VOC in the Baltimore nonattainment area, and six tons per day of VOCs in the state of overall."

The Portable Fuel Container Spillage Control Rule applies to any person or entity who will sell, supply, manufacture for sale, portable fuel containers and/or spouts on or after Jan. 1, 2003.

Individuals will not be required to purchase or replace their existing gas cans with newer compliant fuel containers, nor will the rule make it a crime to continue to use conventional fuel containers. The

change over to the new gas can will be accomplished primarily through attrition. As containers wear out, are lost, damaged or destroyed, consumers will purchase the new spill-proof containers to replace existing conventional containers.

Implementation of the proposed rule will consist of notification, public outreach, and attrition. The time preceding implementation of the rule will focus primarily on notification of retailers and manufacturers to ensure compliance with the proposed regulation and its administrative requirements. This would be coupled with public outreach programs to inform consumers about the proposed regulation, its environmental benefits, and to allow consumers to gain familiarity with the new portable fuel containers and/or spouts. Both outreach and notification processes will continue for a period after the rule is implemented.

### Environmental Benefits

Introduction of the new, environmentally friendly, gas can is designed to maximize VOC emission reductions. It is estimated that VOC emissions because of uncontrolled evaporative and refueling losses would be reduced by approximately 75 percent. In addition, the proposed portable fuel container would:

- Improve water quality by eliminating the potential discharge of fuel into the aquatic environment from the refueling of watercraft and storm drain run-off from streets and parking lots.
- Greatly reduce the amount of gasoline spilled onto the ground while refueling lawn, garden, and small construction equipment, reducing land and groundwater contamination.
- Reduce personal exposure to hazardous constituents present in gasoline, such as benzene, ethyl benzene, and methyl tertiary-

butyl ether (MTBE).

### Implementation

Under the proposed rule, the average cost of a portable fuel container, in sizes ranging from one gallon to six gallon will increase approximately \$6 to \$11 per can, or \$1.20 to \$2.20 annually over the life expectancy of the new gas can. This price increase is not expected to decrease the demand for these containers significantly, but is expected to impose additional costs on the manufacturers of portable fuel containers. These additional costs by the manufacturers are expected to be passed to the consumer because of the low relative price, and because there are few legal substitutes available.

For more information about the new gas can, please contact Parker Dean in MDE's Office of Planning in the Air and Radiation Management Administration at (800) 633-6101, extension 3240.

## DROUGHT

Continued from Page 1

curtail outdoor water use, voluntary measures are currently sufficient. Examples of Level One restrictions include prohibitions against watering of lawns, automated watering of gardens, washing paved areas and non-commercial washing or cleaning of mobile equipment including automobiles, trucks, trailers and boats. There are a number of exemptions to the restrictions, such as allowances for watering newly seeded lawns. An updated list of the restrictions and exemptions is now available on MDE's website at [www.mde.state.md.us](http://www.mde.state.md.us).

The governor also indicated any drought emergency declaration would include two important provisions — the first will allow any local jurisdiction that uses water sources not at emergency levels to opt out of enforcing the mandatory restrictions and the second allows local jurisdictions to impose more stringent restrictions if necessary.

Eleven localities across Central Maryland, including Emmitsburg, Thurmont and Westminster, are already under more extensive mandatory restrictions for residents,

and those restrictions remain in effect.

During the drought of 1999, water usage dropped an incredible 15 to 20 percent across the state when mandatory conservation measures were taken.

"When we faced the drought of 1999, we all learned the important lesson that every drop of water counts," the governor said. "The key to getting through this long-term is for every Maryland home and business to show the same commitment to conservation that we saw three years ago. With all Marylanders working together, we can

see a reduction of at least 10 percent."

The governor suggested several easy steps Marylanders can take to reduce water usage, including repairing leaky faucets, toilets or pipes, using drought-tolerant plants for landscaping, and using a broom instead of a hose to clean sidewalks, decks and other hard surfaces.

For a complete list of water-saving tips and for more information on drought-related issues, log onto MDE's website at <http://www.mde.state.md.us/waterconservation/>

# Enforcement & Compliance Notes

--February 15 to March 15, 2002--

## Air & Radiation Management Administration

**Baltimore Spice – Baltimore County** – MDE issued a Corrective Order and a Notice of Proposed Civil Penalty to Baltimore Spice in the amount of \$28,000 on Feb. 21 to address air quality violations at its Owings Mills spice manufacturing facility. The company was cited for installing equipment without first having the required permits, failure to submit an emission certification report and air toxics analysis, failure to operate air pollution control equipment within specified parameters, and failure to comply with federal air toxics (MACT) reporting requirements. The Corrective Order requires Baltimore Spice to submit within 30 days all past due reports and a plan to bring the facility into compliance and prevent this type of occurrence in the future. The company has 10 days to request a meeting on the penalty and 30 days to appeal the order. **Status:** Open (Reference #AQCP 01-11-04)

**Johns Hopkins Institutes (JHI) – Baltimore City** – MDE issued a Corrective Order and a Proposed Civil Penalty in the amount of \$50,000 to JHI on Feb. 25 for constructing sources of air pollution without the required permits. JHI purchased, installed, and operated two emergency diesel electrical generators in November 1998 without obtaining the required permits. The Corrective Order requires the facility to cease operating the two generators until the required permits are obtained. JHI has 10 days to request a meeting on the penalty and 30 days to appeal the order. **Status:** Open (Reference #AQCP 01-11-05)

**Amcors Flexible Packaging – Washington County** – MDE received \$32,500 on Feb. 25 as payment of a Notice of Assessed Civil Penalty sent to Amcor in January. The action was taken for violations of air quality regulations at the company's flexible packaging plant. Amcor was cited for not conducting required testing, for not submitting certain compliance reports required by its permits, and for not providing timely re-registration forms due to a change of ownership. In response to a previously issued Corrective Order, the company has submitted a plan to address all violations cited. **Status:** Case Closed (Reference #AQCP 01-09-01)

**Kaydon Ring & Seal – Baltimore City** – A Baltimore City Circuit Court judge signed and finalized a Consent Decree on Feb. 25 to settle MDE's air quality enforcement action against Kaydon Ring & Seal. MDE's enforcement action against Kaydon addressed violations of

federal air toxics requirements (MACT Standards) for vapor degreasers and chrome plating. Settlement terms included a \$50,000 penalty and two Supplemental Environmental Projects (SEPs). One SEP is to install new ozone-layer-safe refrigeration and air conditioning units. The other SEP is to pave a dusty materials handling area, thereby reducing dust emissions. The combined value of the SEPs is about \$200,000. Kaydon has returned to compliance and is currently operating in compliance. **Status:** Closed (Reference #AQCP 24-C-02-000818)

**Dry Cleaners** – MDE issued Notices of Proposed Civil Penalties to 12 dry cleaning facilities on March 1 for violations of MACT (federal air toxics) and Maryland air quality regulations. The penalties range from \$100 to \$400 depending upon the extent of the violations. The typical violations are failure to notify MDE of change of ownership, failure to obtain permits to construct, and failure to conduct the required monitoring and record keeping. The dry cleaners have 10 days to request a meeting. **Status:** Open (Reference #AQCP 01-32/40-50)

**Millennium Inorganic Chemicals Inc. – Baltimore City** – MDE issued a Proposed Civil Penalty for \$50,000 to Millennium Chemicals on March 1 for violating parametric monitoring conditions contained in its permit. The permit placed emission and operating limitations on Millennium's cogeneration plant, which consists of six combustion turbines. Millennium's semi-annual report indicated that the steam-to-fuel ratio (surrogate for NOx emissions determined by stack testing) fell below the required level on 198 separate occasions (each violation at each turbine counted as one violation). Since this is a violation of a synthetic minor permit condition, this has placed Millennium on EPA's High Priority Violator list. Millennium has put measures in place to ensure that these violations do not occur again. Millennium has 10 days to request a meeting. **Status:** Closed (Reference #AQCP 02-04)

**Sand Town Foot and Ankle – Baltimore City** – MDE issued a Complaint, Order and an Administrative Penalty in the amount of \$10,000 to Sand Town Foot and Ankle on March 12 for failure to comply with regulations governing the use of a radiation machine. The facility continues to use or possess an uncertified radiation machine. The facility failed to complete the certification process and to respond to a Notice of Violation. Sand Town Foot and Ankle had 10 days to appeal the order and 30 days to appeal the complaint and penalty. **Status:** Open (Reference #RHP 01-04)

## Waste Management Administration

**Andrew M. Bogdan, Jr. – Baltimore City** – MDE issued a Complaint, Order and Penalty on Feb. 19 in the amount of \$35,000 against Andrew M. Bogdan Jr. for violating Maryland's Lead Laws. Bogdan is ordered to: Register or renew the registration of any unregistered properties he owns; within 30 days he must ensure that at least 50 percent of all affected properties that he owns have been brought into compliance with the full risk reduction standard; ensure that no persons other than those performing the lead hazard reduction treatments are on the premises while the work is done; and pay reasonable relocation costs for tenants if the

treatments exceed one calendar day; refrain from evicting or otherwise retaliating against the tenants of the property; within five days of the completion of the lead reduction treatments, have the properties inspected by an accredited inspector and that a certificate is filed by the contractor with MDE certifying the properties have met full risk reduction standards. **Status:** Andrew M. Bogdan, has 10 days to request a hearing on the complaint and order and 30 days to request a hearing on the penalty. (Reference Number 01-30-4092)

**David A. Hamilton, Jr. – Baltimore City** – MDE issued a Complaint, Order and Penalty on Feb. 27 in the amount of \$20,000 against  
**See NOTES, Page 7**

## Public hearings & meetings

### Technical & Regulatory Services Administration

**April 15—9 a.m. until noon**

Maryland Department of the Environment, Chesapeake Conference Room, 2500 Broening Highway, Baltimore

Meeting of the Environmental Noise Advisory Council and the Interagency Noise Control Committee

For more info call Robin Grove, (410) 631-3680.

### Waste Management Administration

**April 11—9 a.m. until noon**

Maryland Department of the Environment, Chesapeake Conference Room, 2500 Broening Highway, Baltimore

Meeting of the Controlled Hazardous Substances Advisory Council

For more info call Emmanuel Ofoche, (410) 631-4460

**April 15—7 p.m.**

Thurmont Town Office, 10 Frederick Road, Thurmont

Informational public meeting to discuss land applying sewage sludge and an application for a permit submitted by Synagro Mid-Atlantic, Inc.

For more info call Martha Hynson, (410) 631-3375 or Gail Castleman, (410) 631-3314

**April 23--9:30 a.m.**

State Office Building, Auditorium, 300 W. Preston Street, Baltimore

Public hearing to receive comments on

an amendment to COMAR 26.13.02 (Removal of a listed hazardous waste, the effluent from the treatment, by chemical neutralization, of mustard agent at the facility located on Aberdeen Proving Ground property.

For more info call Gail Castleman (410) 631-3314.

### Water Management Administration

**April 2—6 p.m.**

Queen Anne's County Free Library, Kent Island Branch Meeting Room, 200 Library Circle, Stevensville

Public hearing on State Discharge Permit #00-DP-0547, Kent Narrow WWTP to increase average flow from 2.0 to 3.0 mgd

For more info call Steve Luckman, (410) 631-3672.

**April 25—7 p.m.**

Kent County Government Center's Hearing Room, 400 High Street, Chestertown

Public informational meeting on an application for State Discharge Permit #02-DP-2562, Horizon Organic Dairy, Inc. – Maryland Farm to discharge wastewater from a dairy operation in Kennedyville to groundwater via spray

For more info call Ching-Tzone Tien, (410) 631-3662.

*Persons needing special accommodation are encouraged to contact MDE's Fair Practices Offices at (410) 631-3964 five days prior to the event.*

# Spring into e-cycling with season events

Decrease the amount of toxic electronic waste entering the municipal waste stream by participating in a local electronics recycling event.

## Allegheny County

**Date:** April 20, 2002

**Time:** 9 a.m. - 2 p.m.

**Location:** Allegheny County Office Complex, Cumberland, Md.

**Contact:** (301) 777-5933 x210

## Anne Arundel County

**Date:** June 8, 2002

**Time:** 9 a.m. - 3 p.m.

**Location:** Heritage Park Office Complex, Annapolis, Md.

**Contact:** Carol Talyor at 410-222-7951

## Baltimore County

**Date:** April 27, 2002

**Time:** 10 a.m. - 2 p.m.

**Location:** Oregon Ridge Park, Cockeysville, Md.

**Contact:** Clyde Trombetti at 410 887-2791 or ctrombetti@co.ba.md.us

## Carroll County

**Date:** April 27, 2002

**Time:** 8 a.m. - 2 p.m.

**Location:** Northern Landfill, Westminster, Md.

**Contact:** Vinnie Legge at (410) 386-2633

## Cecil County

**Date:** April 20, 2002

**Time:** 7:30 a.m. - 3:30 p.m.

**Location:** Cecil Central Landfill Northeast, Md.

**Contact:** Jim Keithley at 410 996-6275 or [jkeithley@cc.gov.org](mailto:jkeithley@cc.gov.org)

## Harford County

**Date:** April 20, 2002

**Time:** 11 a.m. - 3 p.m.

**Location:** Swan Harbor Farm, Harve de

Grace, Md.

**Contact:** Office of Recycling at (410) 638-3417

**Midshore Region** (Caroline, Kent, Queen Anne's and Talbot counties)

**Date:** Sunday, April 21, 2002

**Time:** 10 a.m. to 3 p.m.

**Location:** Centreville Middle School Bus Loop, Centreville, Md.

**Contact:** James Wood (410) 758-6605 or [jwood@friend.ly.net](mailto:jwood@friend.ly.net)

## Worcester County

**Date:** April 20, 2002

**Time:** 10 a.m. - 2 p.m.

**Location:** Ocean City Park & Ride Lot, Ocean City, Md.

**Contact:** Ron Taylor at (410) 632-3177

**\*Permanent collection sites available in Howard, Montgomery, and Prince George's Counties.** Please consult [www.mde.state.md.us](http://www.mde.state.md.us) for more information, such as eligibility to participate and applicable fees.

## Focus on air quality with onset of spring

*Editor's Note: More air quality events will be highlighted in the coming issues of MDEnvironment.*

**By Bob Maddox**

The Clean Air Partners will be holding its Fourth Annual Ozone Action Days Conference on April 26. The conference will be. This daylong event, held this year at Oriole Park at Camden Yards in Downtown Baltimore, is intended to promote public awareness about ground level ozone air pollution, pollution prevention and health protection. The conference will include several plenary sessions, sessions on healthcare, Ozone Action Day activities and lunch.

Clean Air Partners is a volunteer, nonprofit organization that works to improve health and quality of life in this region by educating the public to take voluntary actions to reduce ground-level ozone. The partnership serves central Maryland, D.C. and Northern Virginia.

The conference coincides with Maryland Department of the Environment (MDE)'s ozone monitoring program, which begins in April. For more information about registration for the conference, visit [www.cleanairpartners.net](http://www.cleanairpartners.net).

## NOTES

Continued from Page 6

David A. Hamilton Jr. for violating Maryland's Lead Laws. Hamilton is ordered to: register all pre-1950 residential rental properties he owns with MDE and within 30 days bring 50 percent of the affected properties into compliance with the full risk reduction standard including 1813 N. Port St.; ensure that no persons other than those performing the lead hazard reduction treatments are on the premises while the work is done; and pay reasonable relocation costs for tenants if the treatments exceed one calendar day; refrain from evicting or otherwise retaliating against the tenants of the property; within five days of the completion of the lead reduction treatments, have the properties inspected by an accredited inspector and that a certificate is filed by the contractor with MDE certifying the properties have met full risk reduction standards. **Status:** David A. Hamilton Jr. has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the penalty. (Reference Number 01-30-4296)

**Harding Carter and Jean Ever-Carter – Baltimore City** – MDE issued a Complaint, Order and Penalty on Feb. 27 in the amount of \$12,500 against Harding Carter and Jean Ever-Carter for violating Maryland's Lead Laws. The Carters are ordered to: register all pre-1950 residential rental properties they own with MDE and within 30 days bring 50 percent of the affected properties into compliance with the full risk reduction standard including 2251 McClellery St.; ensure that no persons other than those performing the lead hazard reduction treatments are on the premises while the work is done; and pay reasonable relocation costs for tenants if the treatments exceed one calendar day; refrain from evicting or otherwise retaliating

against the tenants of the property; within five days of the completion of the lead reduction treatments, have the properties inspected by an accredited inspector and that a certificate is filed by the contractor with MDE certifying the properties have met full risk reduction standards. **Status:** Harding Carter and Jean Ever-Carter have 10 days to request a hearing on the complaint and order and 30 days to request a hearing on the penalty. (Reference Number 01-30-4366)

**Barbara I. Joy – Hagerstown** – MDE issued a Complaint, Order and Penalty on March 12 in the amount of \$40,000 against Barbara I. Joy for violating Maryland's Lead Laws. Joy is ordered to: update registration on all affected pre-1950 residential rental properties she owns and within 30 days bring 50 percent of the affected properties into compliance with the full risk reduction standard including the Mulberry Street and Virginia Avenue properties; ensure that no persons other than those performing the lead hazard reduction treatments are on the premises while the work is done; and pay reasonable relocation costs for tenants if the treatments exceed one calendar day; refrain from evicting or otherwise retaliating against the tenants of the property; within five days of the completion of the lead reduction treatments at Mulberry Street and Virginia Avenue, have the properties inspected by an accredited inspector and that a certificate is filed by the contractor with MDE certifying the properties have met full risk reduction standards. **Status:** Barbara I. Joy has 10 days to request a hearing on the complaint and order and 30 days to request a hearing on the penalty. (Reference Number 01-21-3808)

**Bitumar USA, Inc. – Baltimore County** – MDE issued a Complaint and Civil Penalty in the amount of \$17,000 against Bitumar USA, Inc. on March 14 resulting from violations of Maryland's Oil Pollution Laws. Bitumar failed to properly transfer petroleum product from a seagoing vessel to an aboveground storage tank at their Pennington Avenue facility in Baltimore City. The aboveground storage tank overflowed causing approximately 82,000 barrels of oil to discharge onto the ground surface. In addition, the overflow alarm failed to properly function. **Status:** Bitumar USA, Inc. has 10 days to request a hearing on the complaint and 30 days to request a hearing on the penalty. (Reference Number COV-2002-020)

## Water Management Administration

Ernest Martin – Garrett County – MDE issued an Administrative Complaint, Order and Penalty to Mr. Ernest Martin on Feb. 21 regarding alleged sediment control, sediment pollution and waterway construction violations of Maryland law. The Administrative Complaint alleges that Martin performed construction activity without an approved sediment and erosion control plan and placed sediment in an position likely to pollute Clark Run and its tributaries, which are Use III waters of the state protected for the growth of natural trout populations. The Administrative Order requires Martin to obtain and implement a sediment and erosion control plan approved by the Garrett County Soil Conservation District. Martin is also required to remove the earthen fill that was placed in the 100-year floodplain of an unnamed tributary of Clark Run and restore the

stream bank to its original condition. MDE has assessed a \$20,000 penalty in this case. Martin has requested a hearing to contest the Order and Penalty. **Status:** Case Pending. (Reference #AO-02-0142).

**Benjamin's Mobil Home Park – Cecil County** – MDE and Benjamin's Mobile Home Park finalized an Administrative Consent Order on March 12 to resolve past violations of State Discharge Permit #94-DP-1033, as outlined in Administrative Complaint, Order and Penalty #AO-01-0150 issued Feb. 20, 2001, and for additional total suspended solids (TSS) and biochemical oxygen demand (BOD) violations of the Permit since Feb. 20, 2001. The Consent Order requires Benjamin's Mobile Home Park to implement improvements to the wastewater treatment plant to ensure compliance with TSS, BOD and ammonia effluent limits established in the Permit. The Consent Order authorizes interim performance standards for BOD, TSS and ammonia until upgrades of the wastewater treatment plant are completed. MDE assessed and Benjamin's has agreed to pay \$15,000 to the Clean Water Fund in settlement of the alleged Permit violations. **Status:** Case Closed. (Reference #CO-02-0125).

**Water and Sediment Pollution Penalties – Statewide** – During the period Feb. 16 to March 15, MDE collected an additional \$14,230.50 to the Clean Water Fund in settlement of alleged water pollution violations from 11 establishments. MDE also collected an additional \$5,092 in administrative penalties to the Sediment Fund in settlement of sediment and erosion control violations from four facilities.

# For the Record

The following is a partial list by county of applications received by MDE and other permitting activity between February 16, 2002 and March 15, 2002. For more information on these permits, please contact MDE's Environmental Permit Service Center at (410) 631-3772.

## Allegany

BARTON MINING CO. # 338 - 22919 Barton Mine Road, Barton, MD 21521. (2002-OPT-2064) Oil operations permit for above ground storage tank and transportation

GEORGE S. & DIANNA HARTLEY FARM #2, AL-4 - 35108 Whitfield Road, NE, Little Orleans, MD 21766. Sewage sludge application on agricultural land

TRI-STAR MINING, INC. - Barton, MD (97-SP-0513) Renewal application for a surface mine located on north from the intersection of MD Route 135

## Anne Arundel

BITUMAR USA, INC. - 6000 Pennington Avenue, Baltimore, MD 21226. (TR7157) an air permit to construct for modification to asphalt plant with afterburner

CITY OF ANNAPOLIS DEPARTMENT OF PUBLIC WORKS - 160 Dike of Gloucester Street, Annapolis, MD 21401. (02-1029) Sewerage permit to upgrade the Second Street Wastewater Pumping Station at Bay Shore Avenue

FRANCIS E. GARDINER, III, 1025 SKINNER TURN PARTNERSHIP - Crofton, MD (95-SP-0473-B) Modification application for a surface mine located on Route 2 in Lothian

JABIN FAMILY PARTNERSHIP, LLLP, 726 Second Street, Annapolis, MD 21403. Voluntary Cleanup Program application seeking a No Further Requirements Determination as a responsible person for the 1.13-acre Bert Jabin's Eastport Yacht Yard property, located at 726 Second Street, Annapolis, MD 21403

SECOND STREET L.L.C., 726 Second Street, Annapolis, MD 21403. Voluntary Cleanup Program application seeking a No Further Requirements Determination as a responsible person for the 0.68-acre J-World property, located at 211 Eastern Avenue, Annapolis, MD 21403

STONE / SNYDER, LLC. - 846 Ritchie Highway, Severna park, MD 21146. (02-1031) Water permit to install 4 carbon filters at the Headquarters Commercial Center

## Baltimore City

AMERADA HESS CORPORATION - 6200 Pennington Avenue, Baltimore, MD 21226. (TR7118) an air permit to construct for one truck loading rack

BERG CORPORATION, THE - 1001 South Dukeland Street, Baltimore, MD 21223. (TR7160) an air permit to construct for one portable concrete crusher

GRACE DAVISON - 5500 Chemical Road, Baltimore, MD 21226. (TR7131) an air permit to construct for one baghouse

JOHN D. LUCAS COMPANY, THE - 1820 Portal Street, Baltimore, MD 21224. (TR7162) an air permit to construct for one printing press

MASS TRANSIT ADMINISTRATION - 1515 Washington Boulevard, Baltimore, MD 21230. (TR7121) an air permit to construct for one soil vapor extraction system

YOON'S AUTO BODY & PAINT SHOP - 4423 Belair Road, Baltimore, MD 21206. (TR7156) an air permit to construct for one paint spray booth

## Baltimore County

DEVILBISS, CHARLES B. CO. - 109 Beaver Court, Suite 200, Hunt Valley, MD 21030. (TR7179) an air permit to construct for five lithographic presses

EURO SPORTS, INC. - 6323 Baltimore National Pike, Baltimore, MD 21228. (TR7159) an air permit to construct for one paint spray booth

OWINGS COLLISION SPECIALISTS, INC - 15223 Hanover Pike, Upperco, MD 21155. (TR7176) an air permit to construct for one paint spray booth

PIKESVILLE AUTO COLLISION CENTER - 5414 Arcadia Avenue, Upperco, MD 21155. (TR7175) an air permit to construct for one paint spray booth

POTTS & CALLAHAN, INC. - Baltimore, MD (77-SP-0078-O) Renewal application for a surface mine located on from Baltimore Beltway #695

RUCK TOWSON FUNERAL HOME - 1050 York Road, Towson, MD 21204. (2002-05-01979) Air quality permit to operate

## Calvert

CALVERT COUNTY TRANSFER STATION - 401 Sweet Water Road, Lusby, MD 20657. (2002-WTS-0519) Solid waste transfer station permit

COVE POINT LNG L.P. - 2100 Cove Point Road, Lusby, MD 20657. (TR7158) an air permit to construct for PSD/NSR-Resumption of liquid natural gas imp service

HOWLIN LAND CLEARING DEBRIS LAND-FILL - 8580 Nursery Road, Lusby, MD 20657. Solid waste landclearing debris landfill permit

JOHN W. & JANE W. LEITCH PROPERTY - 6795 Briscoe Turn Road, Owings, MD 20736. Sewage sludge application on agricultural land

## Caroline

BELL CREEK FARM, CR-108 - 5940 Bell Creek Road, Preston, MD 21655. Sewage sludge application on agricultural land

## Carroll

CARROLL CREMATION SERVICES - 934 South Main Street, Hampstead, MD 21074. (2002-

013-00126) Air quality permit to operate

MILLER ASPHALT - WESTMINSTER - 390 Vision Way, Westminster, MD 21158. (2002-OPT-3548) Oil operations permit for above ground storage tank and transportation

TOWN OF MT. AIRY - P. O. Box 50, 110 South Main Street, Mt. Airy, MD 21771. (02-1032) Water permit to construct a water treatment facility (Well No. 9) and a booster station, located at MD Route 27 and I-70

## Cecil

MONTGOMERY, TOM - P. O. Box 707, Rising Sun, MD 21911. (02-1028) Water permit to construct a water treatment plant to serve Mechanics Valley Business Center, southeast corner of US Route 40 and Mechanics Valley Road

PERRYVILLE WWTP - 72 Firestone Road, Perryville, MD 21903. Sewage sludge distribution permit

YORK BUILDING PRODUCTS, INC. - York, PA (02-SP-0596) Original application for a surface mine located on from North on I-95

## Charles

CHANEY ENTERPRISES - DOBSON/LANGLEY PIT - 4500 Block Of Piney Church Road, Waldorf, MD 20601. Sewage sludge application on marginal land

HUNTT FUNERAL HOME, INC. - 3035 Old Washington Road, Waldorf, MD 20601. (2002-017-00059) Air quality permit to operate

J. S. BOWLING, JR. PROPERTY, CH-58 - 10460 Old Sycamore Road, Charlotte Hall, MD 20622. Sewage sludge application on agricultural land

THOMAS C. WELCH PROPERTY, CH-36 - 13100 Ag Supply Place, Charlotte Hall, MD 20622. Sewage sludge application on agricultural land

## Dorchester

DORCHESTER GENERAL HOSPITAL - 300 Byrne Street, Cambridge, MD 21613. (2002-OPT-2287) Oil operations permit for above ground storage tank and transportation

LEHMAN L. BAILEY & SON, INC. - 6425 Bailey Store Road, Federalsburg, MD 21632. (2002-OPT-5966) Oil operations permit for above ground storage tank and transportation

## Frederick

BALLENGER CREEK WWTP - 7400 Marcie's Choice Lane, Frederick, MD 21704. Sewage sludge transportation permit

DETRICK OVERLOOK, LLC, c/o Real Estate Development Services, LLC, 11600 Sunrise Valley Drive, Suite 270, Reston, VA 20191. Voluntary Cleanup Program application seeking a No Further Requirements Determination as a responsible per-

son for the 86.3-acre Waverley View property, located at 1831 Shookstown Road, Frederick, MD 21701

TAMKO ROOFING PRODUCTS, INC. - 4500 Tamko Drive, Frederick, MD 21703. (TR7180) an air permit to construct for two bag houses

TOWN OF WOODSBORO - P. O. Box 88, Woodsboro, MD 21798. (02-1021) Sewerage permit to upgrade and expand the existing Woodsboro Wastewater Treatment Plant

## Garrett

GARRETT COUNTY PEAT PRODUCTS, LLC - Accident, MD (02-SP-0595) Original application for a surface mine located south on US 219

WHITE FACE FARM SPRAY IRRIGATION FACILITY - Bumblebee Road, McHenry, MD 21550. (02DP3408) Groundwater municipal discharge permit

## Harford

CONSOLIDATED PRINTING COMPANY - 1301-B Governor Court, Abingdon, MD 21009. (TR7178) an air permit to construct for two lithographic presses

HARFORD COUNTY DEPARTMENT OF PUBLIC WORKS - 101 South Main Street, Bel Air, MD 21286. (02-1024) Sewerage permit to construct gravity sewers along Emmorton Road and Trimble Road

INDEPENDENCE CONSTRUCTION MATERIALS - 910 Old Philadelphia Road, Aberdeen, MD 21001. (TR7161) an air permit to construct for one temporary crushing/screening plant

NORTH HARFORD COLLISION CENTER - 1607 Dooley Road, Whiteford, MD 21160. (TR7173) an air permit to construct for one paint spray booth

## Howard

FOREST RECYCLING PROJECT (FRP) INC. - 5050 Sheppard Lane, Ellicott City, MD 21042. (02DP3407) Surface industrial discharge permit

OWENS CORNING - JESSUP ROOFING PLANT - 8235 Patuxent Range Road, Jessup, MD 20794. (02DP1125) Surface industrial discharge permit

## Montgomery

ACCUBID EXCAVATION, INC. - 7901 Georgia Avenue, Silver Spring, MD 20910. (TR7144) an air permit to construct for one temporary crusher

BEN PORTO & SON, LTD/TRI-STATE STONE & BUILDING SUPPLY, INC. - Bethesda, MD (77-SP-0057) Renewal application for a surface mine located on south of River Road

Continued on next page

# For the Record

FEDERAL REALTY INVESTMENT TRUST, 1626 East Jefferson Street, Rockville, MD 20852. Voluntary Cleanup Program application seeking a No Further Requirements Determination as a responsible person for the 16.4-acre Gaithersburg Square Shopping Center property, located at 460-582 North Frederick Street, Gaithersburg, MD 20877

## Prince George's

BELTSVILLE SHELL - 10920 Baltimore Avenue, Beltsville, MD 20705. (TR7149) an air permit to construct for one groundwater remediation system

CEDARVILLE PARK, INC. - 2 Industrial Park Drive - Suite H, Waldorf, MD 20602. (02-1023) Sewerage permit to construct a wastewater treatment plant at the Cedarville Mobile Home Park, Cedarville Road, Brandywine

FORT LINCOLN CEMETERY - 3401 Bladensburg Road, Brentwood, MD 20715. (2002-033-00478) Air quality permit to operate

LEE FUNERAL HOME - 6633 Old Alexandria Ferry Road, Clinton, MD 20735. (2002-033-01317) Air quality permit to operate

NATIONAL ARCHIVES - 8601 Adelphia Road, College Park, MD 20740. (TR7181) an air permit to construct for one emergency generator and one fire-pump engine

NAZCON, INC. - 6500 Ammendale Road, Beltsville, MD 20705. (TR7143)an air permit to construct for one baghouse

PISCATAWAY WWTP - 11 Farmington Road West, Accokeek, MD 20607. (02DP0667) Major surface municipal discharge permit

RUBBLE BEE RECYCLING & DEMOLITION - 4866 Eastern Avenue, Suitland, MD 20746. (TR7163) an air permit to construct for one portable crusher

SOUTHSTAR LIMITED PARTNERSHIP, PG-188 - Brandywine Road & Lee Acres Drive, Brandywine, MD 20613. Sewerage sludge application on agricultural land

## Queen Anne's

BRADFORD ENTERPRISES, INC. - 3214 Main Street, Grasonville, MD 21638. (TR7129) an air permit to construct for one temporary crushing plant

CALVIN GRAY PROPERTY - 162 Shrewsbury Farm Lane, Centreville, MD 21617. Sewerage sludge application on agricultural land

ERNEST & GORDON MYERS,QA-43 - 620 Fogwell Road, Centreville, MD 21617. Sewerage sludge application on agricultural land

RALPH WHALEY STANT FARM - 200 Stant Farm Lane, Price, MD 21656. Sewerage sludge application on agricultural land

WISE FUEL & OIL, INC. - WYE MILLS - 350 Grange Hall Road, Wye Mills, MD 21679. (2002-OPT-4567) Oil operations permit for above ground storage tank and transportation

## Somerset

DELMARVA OIL, INC.-DMO HOLLANDS CROSSING PLANT - MD Route 413 & Hollands,

## Secretary reads to students

On March 1 Maryland Department of the Environment (MDE) Secretary Jane T. Nishida participated in the National Education Association's (NEA) Read Across America event at Bells Mills Elementary School in Montgomery County. The Secretary read to two groups of fifth graders and handed students MDE commuter choice bookmarks and sunglasses for their attentiveness. NEA's Read Across America is an annual reading motivation and awareness program.
