## School, living laboratory earn 25<sup>th</sup> Tawes awards

By Richard McIntire

An Annapolis elementary school and a foundation that educates children on the environment through its living laboratory shared top honors at the 25th annual Tawes Awards for a Clean Environment, presented May 16 in the Blue Heron Center at Quiet Waters Park in Annapolis. St. Mary's Elementary School and the Alice Ferguson Foundation in Prince George's County won in the youth and adult categories respectively.

The Tawes Award is an environmental recognition program sponsored by the Maryland Department of the Environment (MDE) and the Maryland Petroleum Council (MPC) in the name of late Maryland Governor J.

Millard Tawes, who was also the state's first secretary of the Department of Natural Resources (DNR). The award is open to any individual, civic, community, or non-profit entity that has demonstrated outstanding efforts to enhance Maryland's environment over a period of time or with a single project.

"The Tawes awardees represent some of what is best about Maryland, its people," said MDE Assistant Secretary Denise Ferguson-Southard, who issued the awards with MPC Executive Director Drew Cobbs. "For 25 years, the Tawes award recipients, have not only walked the talk of environmental stewardship, but have planted the trees, cleaned the streams, built the buffers, and restored

## Governor unveils water policy for state agencies

Continuing his commitment to improving the lives of Marylanders while aggressively protecting the environment, Governor Parris N. Glendening signed a May 24 executive order establishing a water conservation goal of 10 percent for state facilities. Guided by previous experience, the Governor is also encouraging Marylanders to take steps to conserve water in their daily lives. State facility water conservation will be phased-in, beginning with a usage reduction goal of seven percent by 2003; eight percent by 2005; nine percent by 2007 and achieving 10 percent by 2010.

The executive order also requires a water use audit at all state-owned and leased facilities. Each state agency will also be required to submit water conservation plans to the Maryland Department of the Environment (MDE) by October 1. Above, Gov. Glendening and MDE Secretary Jane T. Nishida review a collection of affordable water saving devices. For water conservation facts and tips, log on to the MDE website at: [www.mde.state.md.us](http://www.mde.state.md.us).

## Intern pilot helps environment, saves area companies' money

By Mary Collins, University of Maryland Engineering Research Center

A summer job can lead to a cleaner environment and valuable career experience for some college students. The Maryland Department of the Environment (MDE) joined forces in 2000 with the University of Maryland's Technology Extension Service (MTES) to develop a pollution prevention (P2) internship program. Last year's success prompted the program into being offered again this summer.

The interns are selected by the university and are trained in a relevant industry sector, as well as in general P2. The interns then work with selected businesses to identify P2 opportunities, provide cost-benefit information and assist with implementation of accepted changes.

Paul Gietka, manager of the Environmental Engineering Program for the Engineering Research Center and senior consultant for the MTES Northern Regional Office in Baltimore, and Dr. Barry Frey, manager of MDE's Eastern Shore Regional Office in Salisbury, are the project managers responsible for identifying participating companies and coordinating all aspects of the interns' work.

Faculty representatives, Dr. Allen Davis at the University of Maryland, College Park and Dr. Elichia Venso of Salisbury State University help recruit and select students and also provide technical assistance throughout the project.

Airpax Electronic Packing Products of Cambridge, took part in the internship program last summer. Their student intern,

Emily Muraro, an environmental health major from Salisbury State University, worked with them over the summer to research ways to reduce water usage and the amount of out-going waste materials.

"We benefited in several areas from this intern's work," said Woody Cannon, a manager at Airpax. "She had the time and freedom to do the necessary research and testing on site. Having an intern allowed us to continue with our daily operations and still achieve the required research."

Muraro said her summer of hard work turned out to be a great learning experience especially when company officials decided to implement her recommendations as they renovate their plating shop.

"The program is really geared toward understanding the business," she said. "I was able to really look at what Airpax does, analyze data, make recommendations and see results. I feel fortunate that I got to work with Airpax to reduce pollution. I really felt like I was making a difference at the end of the day."

And Cannon attributed Airpax's ability to immediately reduce "dragout" by increasing rack drain time to Muraro's summer research. Dragout is the excess plating from an electroplating process in Airpax's production for glass and metal seals, or cleaning solutions that clings to the part when it is removed from a solution tank and rinsed.

"This excess solution is the contaminant that pollutes the rinse water," Gietka explained. "It must be removed from the wastewater before this water can be dis-

Above, P2 intern Ahmad Toullabi, right, works with Paul Wajbel of General Die Finishing Company in Baltimore.

charged. This subsequent removal creates sludge which is the removed contaminants."

In addition to reducing the volume of wastewater requiring treatment, reducing dragout also cuts down on metals lost from the plating process. This lessens both plating chemical usage and the quantity of metal sludge generated by the treatment process.

Ahmadreza "Ahmad" Toullabi, a graduate student in environmental engineering at the University of Maryland, College Park, worked last summer with the General Die Finishing Company of Baltimore, a metal finishing shop with activities ranging from painting to anodizing metal components for equipment manufacturers. His assessment was aimed at reducing the generation of hazardous waste at the facility, while concentrating on planning and implementation of pollution prevention practices for the company's future location in Harford County.

## AWARDS Continued from Page 1

the wetlands. They know and understand that what we do today will have an impact on tomorrow. Through their projects and service they help us spread the message of personal responsibility in caring for our natural world."

Fifth and sixth graders at St. Mary's Elementary won their award for work on several environmental projects including: the construction of a butterfly garden on school property and controlling soil erosion with vegetation. They also grew wild celery (a subaquatic plant) in the classroom, which was later transplanted in the Chesapeake Bay near Sandy Point State Park with assistance from DNR.

In addition to maintaining an extensive recycling program in their classrooms, St. Mary's students have also displayed their dedication to the state's wildlife by raising baby Maryland terrapins to be released back into the wild and have collected more than \$800 to rescue terrapins caught by fishermen.

Since 1954, the Alice Ferguson Foundation has welcomed more than 10,000 children a year to its living laboratory. The

foundation is situated on more than 300 acres of wetlands, forests, pasture, creeks and two miles of Potomac River shoreline in Accokeek. The foundation was instrumental in starting "River Clean Up Day." Over the past 13 years, volunteers who participate in River Clean-up Day have hauled nearly 550 tons of trash from the Potomac River and its tributaries at more than 100 sites, from Hampshire County in West Virginia to St. Mary's County in Maryland. The foundation coordinates numerous federal, state, county and city governments, businesses, non-profits and neighborhood associations to make the annual Potomac watershed cleanup successful.

The Runner-up in the youth category was the Dulaney High School Key Club in Timonium. Last year the Key Club conducted two major planting projects to increase the size of the riparian barrier along 750 feet of the Dulaney Branch, a tributary of the Loch Raven Reservoir.

The club, which is sponsored by the Kiwanis club of Timonium-Hunt Valley, also constructed two bat houses and 10

bird houses, planted trees at Gunpowder Falls State Park, took water samples and inspected area streams for erosion.

The efforts of the club were expanded beyond the borders of Baltimore County when members helped gather acorns and walnuts to assist in the collection of seeds for the state nursery at Preston in Caroline County.

The Runner-up in the adult category was Gloria Heisserman, an environmental educator at the Nanjemoy Creek Environmental Center, operated by Charles County Public Schools, and co-founder of the Nanjemoy/Potomac Environmental Coalition.

A panel of judges chooses the Tawes Award winners and runners-up. Last year's winners included the Vienna Elementary School and Lynn Kramer, founder of Baltimore City's Herring Run Watershed Association.

For more information on the Tawes Award for a clean Environment, please call (410) 269-1850 or MDE's Office of Communications at (410) 631-3003.

# Dept. Secretary crosses over into private life, for now

By Richard McIntire

Arthur Ray is a man at a crossroad ... in his career and life. For nearly the last six years, Ray served as Deputy Secretary of the Maryland Department of the Environment (MDE). Before that he held ranking positions at two area utility companies and even litigated two of the nation's biggest pollution cases.

Now, at least for a few weeks, he plans on doing very little, while contemplating his next moves.

Enforcement and compliance were his main areas of focus while at MDE. The agency's enforcement and compliance workgroup was formed under his direction, bringing the major enforcement players within the agency together to foster consistency in the way MDE counts and publicizes its enforcement and compliance actions.

In 1996 the workgroup's labor helped develop MDE's first enforcement and compliance report.

"It allowed us to tell our story our way," Ray said proudly. "That was really significant because EPA would have one spin on the way we did things. Environmental groups were taking our information and skewing it one way. And I thought it was very important to have our information in a form that we could tell the public the good job that we were doing."

Ray also set up the agency's first inspectors' forum that the agency hosts annually. The forum brings more than 200 MDE inspectors together for two days to discuss issues and have an opportunity to speak with management about matters that are significant to them.

"I believe this was important because the inspector forces are the eyes and ears,

the very heart of this organization," he said.

But it was his work in the environmental justice arena where most agree Ray has left his mark. "That's something I've been looking at most of my professional career ... that the poor and minority citizens might have equal protection under environmental laws," he added.

In concert with others in state government, Ray helped craft legislation and served on the council that led to Gov. Parris N. Glendening's signing of an executive order that established the Maryland Commission on Environmental Justice and Sustainable Communities earlier this year.

"You came in thinking you could change the world," Ray said when looking back on his MDE experience.

"You have so many bright ideas about how you can make an organization different. The stark reality hits you after a while that you cannot make all the changes you want. You can only make a few small changes, maybe help a few people along the way, give people some opportunities. In some senses, I feel I could have and should have done more. I gave it the best that I could.

It's been a hell of a ride."

Satisfying certain stakeholders is MDE's most difficult challenge, he went on to say. "I think we've [MDE] bent over backwards to try and involve stakeholders in what we do and our procedures to make them understand, but there are certain folks who won't take yes for an answer. And that's pretty frustrating."

"I really think the department's administrations need to come together and work more as a team," he added. "They've come a long way in doing that, but there are a lot of major issues coming down the pipeline that won't logically fall into one media. Multi-media approaches are going to be called for. This agency could be

a lot better in its strategic planning. Sit down and forecast what may be the new trends in the future and see how we can spend our resources on that."

Ray added that the development of MDE's enterprise database is the agency's most exciting project and "a critical need." It will integrate all the agency's various information sources

PHOTO BY RICHARD MCINTIRE  
Arthur Ray

such as permits, inspection reports and global information system data, into one database.

"I've had some opportunities to work with some great people here. The department really has some of the most committed folk that I've ever had the privilege of working with."

In the joking way that is as much a part of his personality as his deep bass voice, Ray said he got into environmental protection as "happen stance."

"I've never been hunting. I've never been fishing," said the native Washingtonian. "If I get too far from a place that doesn't have a TV going I get nervous."

It was his work at the Legal Aid Bureau of Baltimore doing child abuse and child neglect cases that struck a cord. "I represented the kids," he said. "I've always been interested in people. I've always been in people type programs. This area has always had a huge amount of creativity. There are no real set answers. You almost have to make them up as you go along."

A new job search led him to the U.S. Environmental Protection Agency (EPA) and its Water Enforcement Office, where he spent 12 years, specializing in toxics and pesticides. He served on the Love Canal prosecution team and was the lead attorney on the Tom's Beach dioxin case in Missouri while there.

By the late '80s the big cases were "drying up," he said, so he took a position as the senior environmental attorney at then Baltimore Gas & Electric. From there he went to the Potomac Electric Power Company as manager of permits and licensing before accepting his role at MDE.

See RAY, Page 4

## Students help create new arboretum wetland for Eastern Shore park

By Amanda Sigillito

What better way to spend a glorious spring day than by doing something that benefits both the community and the environment!

That's how staff of the Maryland Department of the Environment's nationally recognized Wetlands and Waterways Program spent April 25. Program staff spearheaded the creation of an approximately one-acre nontidal wetland in a former in-stream pond located at the Adkins Arboretum in Caroline County.

This important project was constructed in cooperation with the Adkins Arboretum, the State Highway Administration, the Department of Natural Resources and the Eastern Shore Resource Conservation and Development Council, and is required mitigation for permitted wetland impacts resulting from the widening of MD Route 404 in Caroline County.

In preparation for the wetland construction, a 10-foot deep pond was drained in

August 2000. More than 500 fish and several turtles were seined out of the pond and transferred to the large lake at nearby Tuckahoe State Park. Last September, the

pond area was filled with soil and graded to mimic the natural stream channel and wetlands immediately upstream of the site. On April 25, Wetlands and Waterways Pro-

MDE FILE PHOTO

At left science students from Stevensen Middle School helped MDE staffers plant more than 40 different species of plants at Adkins Arboretum.

gram staff, SHA personnel, the arboretum's landscape architect, Debbie Herr, and the plant supplier, Steve Goodyear, provided guidance to 18 science class students from Stevensville Middle School. The eager students planted 40 different species of trees, shrubs and herbaceous plants - 900 plants in all.

The non-tidal wetland will provide wildlife habitat and food, and will filter water from the upstream drainage area. Some of the herbaceous plants, blue flag and cardinal flower, will produce vibrant flowers and attract flying insects like butterflies and honeybees. In addition to the water quality and wildlife benefits, this wetland will serve as an important component of the

See WETLANDS, Page 4

## RAY Continued from Page 3

Ray said there are a few things he's "exploring" before figuring out his next step. Maybe he'll go back into the federal government or find a spot with a utility. He's also thinking about writing on environmental justice issues. But one day, for sure, he'll pull together his "wacky" stories of being an environmental "gun slinger," as he puts it.

"The environment will clearly still be around," he said. "After almost 21 years working this area, it's given me a great career and there's still a lot of things that

need to be done."

Although his recent departure from MDE was unexpected to most in the agency, one cannot help but wonder what Ray has up his sleeve. "I've got a few more scams left," he said. "I can't stay without a job too long. I've got expenses," noting that his eldest daughter, Alter, is off to college at Xavier University in New Orleans this fall. He also has twin 15-year olds, Aaron and Lauren.

Family is important to him. "It's what keeps me straight," said the 50-year old

Columbia resident, who recently celebrated 20 years of marriage to his wife Tonya.

His other passions include jokes, jazz, and old rhythm and blues music. Since the age of four he's collected comics. A few copies of "Spider Man #1," an original "Doctor Doom," and a "Fantastic Four #5" are among the group. "Bat Man is the most classic character," he said. "You can see him being driven by certain voices. I guess there's a little bit of that in all of us."

## WETLANDS Continued from Page 3

arboretum's environmental education programs. Many science classes are expected to visit the wetland so that students can learn in the field about these very important natural resources.

Ellie Altman, the director of the Adkins Arboretum, noted that the new wetland was made possible through the partnership developed between MDE and the Arboretum. In particular, Altman singled out George Beston, chief of the Mitigation Section in MDE's Nontidal Wetlands and Waterways Division, as being re-

sponsible for making the project a success.

"George has a real can-do attitude," she said. "He is a model for [MDE] employees."

The newly created nontidal wetland has become the arboretum's centerpiece, as it is located in front of the visitor's center. Arboretum visitors will enter the center via a boardwalk that crosses over the wetland.

In addition to the magnificent new wetland display, the arboretum has several

other interesting nature displays, an art exhibit that rotates every two weeks, a gift shop and a bookstore.

Other attractions include an annual plant sale held the Saturday before Mother's Day, and a haunted hayride the weekend before Halloween.

The Adkins Arboretum is located in Ridgely, Caroline County off of MD Route 404. Its hours of operation are Monday through Saturday, 9 a.m. to 5 p.m. Although the grounds are open on Sundays, the visitor's center is closed.

## Coastal Bays' TMDL report due out this summer

A critical responsibility of the Maryland Department of Environment (MDE) in the on-going process of developing essential tools for the proper stewardship of Maryland's Coastal Bays is coming to a close.

The department's Technical and Regulatory Services Administration (TARSA) has involved a wide array of stakeholders in guiding MDE's multi-year initiative to establish maximum allowable nutrient loading goals for the northern Coastal Bays (Assawoman and Isle of Wight).

Soon, those nutrient goals will be laid out in the form of a draft Total Maximum Daily Load (TMDL) report for public comment. A TMDL is an estimate of the maximum amount of a given pollutant that a body of water can assimilate without violating water quality standards. Once established, the TMDL will provide bounds within which future-planning decisions must be made to assure the protection of the Coastal Bays for generations to come.

"It will be gratifying to see this long process result in a meaningful framework for restoring and protecting this delicate waterbody," said Rebecca Williams, MDE's lead analyst on the project. "These bays are surprisingly shallow, only about four feet in most places, and thus very susceptible to excessive algal growth fed by nutrient loads."

To the credit of the Maryland Coastal Bays Program (MCBP), steps are already being taken to address the nu-

trient problem.

"The Maryland Coastal Bays Comprehensive Coastal Management Plan [CCMP], which has been in place since 1999, will serve as a key vehicle for implementing the TMDLs," according to MCBP Executive Director David Blazer.

Maryland Department of Natural Resources Coastal Bays Monitoring Coordinator Cathy Wazniak, assigned to work with the MCBP, also deserves credit for her role in a technical coordination group that provided critique and guidance to MDE, according to Jim George, MDE Computer Modeling Program Manager.

"Cathy asked a lot of probing questions during the model development process, and her knowledge of past studies was extremely helpful," George said.

Stakeholders on the Maryland Coastal Bays Implementation Committee have also been kept abreast of the TMDL development.

"They have urged us to express the results in terms of the percentage reduction needed to reach the TMDL, but to explain that it is an uncertain estimate," George added. "Computing the percentage reduction requires two estimates: An estimate of the existing loads, and an estimate of the TMDL (the maximum allowable load). We're comfortable with our TMDL estimate, but estimates of the current non-point source loads are less certain." This implies the potential need for a more sophisticated watershed model in the future.

Another key stakeholder in the Northern Coastal Bays region is Ocean City, where officials know better than most that summer-time odors from decaying algae would hurt the tourism industry, which is vital to their local economy.

"We feel that MDE has heard our views and will incorporate our situation into the TMDL documentation," said Terry McGean, city engineer for Ocean City. The city is striving to implement stormwater management and other measures within the context of the CCMP.

"The stakeholders that have helped us develop the TMDL recognize the analysis has some limitations, specifically the fairly coarse geographic resolution in some locations, and the imprecise estimation of current non-point source loads, which really do not affect the TMDL estimation," George said. "They realize, however, that we are taking an adaptive management approach. This will assure that progress is made now, with the intent of monitoring and refining the analysis if warranted in the future."

The draft TMDL report will be available for public comment this summer. The draft report will be posted on the Department's TMDL website at: [www.mde.state.md.us/TMDL](http://www.mde.state.md.us/TMDL).

Anyone interested in being notified of the report's availability for public review should contact Melissa Chatham at (410) 631-3902 to be placed on an interest list.

--Compiled by TARSA staff members.

By Andrew Gosden

This column is focused on questions concerning business environmental compliance issues. Since many questions may require more space than is available to answer fully, these answers will often provide contact information for more detailed information. Please submit questions to Maryland Department of the Environment (MDE), EPSC - Ask MDE, 2500 Broening Highway, Baltimore, MD 21224. You can also e-mail your questions to [EPSC@mde.state.md.us](mailto:EPSC@mde.state.md.us) with Ask MDE in the subject line. Questions that are of general interest will be answered in this column.

**Q.** I am interested in starting an animal crematory. What are MDE's requirements for this kind of business?

**A.** Both animal and human crematories, require an air quality permit to construct and an air quality permit to operate. Because these sources require a permit to operate, the air quality permit to construct requires public participation. This makes the standard turnaround time six months if there is little public interest or possibly 11 months if there is extensive public interest.

Applicants are required to get the air quality permit to construct before the construction of the source begins, which means the permit is needed before the crematory is delivered to the site. The permit to construct will contain temporary operating conditions needed during the start up of the facility. The department will issue the final state permit to operate when satisfied that the operation complies with air quality requirements.

Form 10 [Application for Incinerator] along with Forms 5A and 5B are needed to apply for the permit to construct an animal or human crematory, while Form 27 is used for the permit to operate. These forms are available on MDE's Web site — [www.mde.state.md.us](http://www.mde.state.md.us) — or you can contact the Environmental Permits Service Center at (410) 631-3772 or the Air and Radiation Management Administration (ARMA) at (410) 631-3230. ARMA can also provide information on the fees required. Finally, please remember to read the permit carefully for important record keeping and compliance information.

Although the information provided in this column is generally accurate for the specific situations that are addressed, it is not a substitute for compliance with any requirements. Due to the complex nature of environmental regulations, you should call the Maryland Department of the Environment through the Environmental Permits Service Center if you have any questions about your permit or how the regulations may apply to your situation.

# Area riders make Bike to Work Day events successful

By Bob Maddox

The month of May found commuters in both Baltimore and Washington, D.C. putting the pedal to the metal as each city held successful Bike to Work Day events.

The Maryland Department of the Environment (MDE), along with the Baltimore Metropolitan Council, Hard Rock Café and others

organized the Baltimore event held May 11, while the Washington Area Bicyclist Association and Commuter Connections organized the D.C.-area event on May 4. The events were held to celebrate National Bike Month and to show that bicycling is a clean and viable means of transportation.

"The D.C. event on May 4 was awesome,"

said Muriel Bowser of Commuter Connections. "Over 1,000 people bicycled to various rally sites in the metro area. Over 400 people rode to the rally at Freedom Plaza in downtown D.C., including Mayor [Anthony] Williams."

Baltimore's event included a rally hosted by the Hard Rock Café, where more than 100 bike commuters stopped by for a breakfast of coffee, tea and bagels. Employees of the American Visionary Art Museum adorned wigs of pink flowers and rode bicycle-powered kinetic sculptures of a pink poodle and a hula dancer to add a festive kick to the bike fleet.

Among the Baltimore riders was Brian Walton, former member of Canada's Olympic cycling team and a 1996 silver medal winner,

administrator Parker Williams of the Maryland State Highway Administration and Penny Troutner, chair of the Mayor's Bicycle Advisory Committee. "It's great to see all of you," Troutner told the crowd. "You are proof that Baltimore needs to do more to make this a bike-friendly city."

Special thanks are offered to the Baltimore Museum of Art; AVAM; Light Street Cycles; the Maryland Science Center; Baltimore Museum of Industry; Port Discovery; B & O Railroad Museum; Downtown Athletic Club; Dick's Sporting Goods; Baltimore Orioles; the Walters Art Museum; and the Maryland State Highway Administration for sponsoring Baltimore's event.

The above band of MDE workers participated in this year's Bike to Work Day.

## INTERNS Continued from Page 2

"We were very impressed with Ahmad ... the whole program is outstanding," said Paul Wajbel, of General Die Manufacturing. "Everyone (intern and advisors) did a great job and was very accessible. I would do it all over again."

Now that the company is nearing completion of its move to Edgewood, they are seeking Ahmad's expertise again on implementing his suggestions for pollution prevention. Results from Toullabi's study showed the company ways of reducing waste treatment and disposal costs, leading to a cleaner en-

vironment with less cost to the manufacturer. Toullabi's study contends that General Die could save an estimated \$35,000 to \$45,000 annually in water usage, waste and wastewater treatment and chemical usage.

This summer two new companies are welcomed into the program. The selection process is going on now. For more information about participating, call Paul Gietka at MTES (410) 706-3445, pg26@umail.umd.edu, or MDE P2 Coordinator Laura Armstrong at (410)631-4119, larmstrong@mde.state.md.us.

## Public hearings & meetings

### Air & Radiation Management Administration

**June 11 — 6:30 p.m.**

Potomac Branch of the Montgomery County Library, 10101 Glenolden Drive, Potomac. Public hearing concerning an application for an air quality Permit to Construct submitted by F. O. Day Bituminous Company, LLC to modify 500-ton per hour drum mix asphalt plant to burn natural gas, No. 2 fuel oil, and "on-spec" used fuel oil. For more information call Robert Maddox, (410) 631-3265

### Technical & Regulatory Services Administration

**June 4 — 9:30 a.m. to Noon**

MDE, Chesapeake Conference Room, 2500 Broening Highway, Baltimore. Meeting of the Environmental Noise Advisory Council. For more information call Robin Grove, (410) 631-3680

### Waste Management Administration

**June 7 — 9 a.m.**

MDE, Chesapeake Conference Room, 2500 Broening Highway, Baltimore, Md.. Meeting of the Controlled Hazardous

Substances Advisory Council. For more information call Emmanuel Ofoche, (410) 631-4460

**June 19 — 7 p.m.**

Chestertown Middle School, 402 E. Campus Avenue, Chestertown. Informational meeting and public hearing on APG's Chemical Agent Disposal Facility's RCRA permit modification application. For more information call Ed Hammerberg, (410) 631-3345

**June 21 — 7 p.m.**

Edgewood Senior Center, 1000 Gateway Drive, Edgewood. Informational meeting and public hearing on APG's Chemical Agent Disposal Facility's RCRA permit modification application. For more information call Ed Hammerberg, (410) 631-3345

### Water Management Administration

**June 1 — 9:30 a.m. to 12:30 p.m.**

DNR, Lobby Conference Room, 580 Taylor Ave., Annapolis. Meeting of the State Water Quality Advisory Council (SWQAC). For more information call Christine Thomas (410) 631-3524

**June 6 — 6:30 a.m.**

MDOT, 2<sup>nd</sup> Floor Conference Room, 10 Elm Street, Linthicum. Public meeting of the State Board of Environmental Sanitarians. For more information call Douglas John, (410) 631-3167

**June 7 — 6:30 p.m.**

Talbot County Free Library Meeting Room, 100 W. Dover St., Easton. Public hearing regarding the tentative determination for State Discharge Permit #00-DP-0579, Easton Utilities Commission, to discharge domestic and industrial wastewater from the Easton WWTP to Councell Creek. For more information call Stephen Luckman, (410) 631-3671

**June 19 — 6:30 p.m.**

Hurlock Community Center Meeting Room, 220 S. Main St, Hurlock. Public hearing regarding the tentative determination for State Discharge Permit Application for New Earth Services, Inc., #99-DP-3311, to discharge runoff from compost piles of food-processing residuals from land leased from the Dorchester County Landfill to groundwater via constructed-wetland infiltration and overland flow. For more information call Ching-Tzone Tien, (410) 631-3442

**June 21 — 10 a.m.**

National Wildlife Research Center, 10901 Scarlet Tanager Loop, Laurel. Public meeting of the Board of Waterworks and Waste System Operators. For more information call Douglas John, (410) 631-3167

**June 27 — 9 a.m.**

MDE, TARSA's Conference Room, 2500 Broening Highway, Baltimore. Public meeting of the State Board of Well Drillers. For more information call Willie Everett, (410) 631-3167

\*\*Persons needing special accommodation are encouraged to contact MDE's Fair Practices Offices at (410) 631-3964 five days prior to the event.

### MTBE task force meets

The MTBE (methyl tertiary-butyl ether) Task Force will meet the following dates for the remainder of 2001: June 21, Sept. 13, 27, Oct. 11 and 25, Nov. 8, 15 and 29. All dates are Thursdays and the meetings will be held from 2-4 p.m. in the Chesapeake Conference Room at MDE headquarters located at 2500 Broening Highway, Baltimore, Md. 21224. Dates are subject to change. Please contact Nancy Bien at (410) 631-3442 to confirm dates.

# Enforcement & Compliance Notes

## Air & Radiation Management Administration

**Southern States, Inc., Baltimore County** – MDE issued a Notice of Assessed Civil Penalty in the amount of \$5,000 to a Southern States gasoline station on April 30 for violating gasoline vapor recovery requirements. The violations resulted in excess emissions of volatile organic compounds to the atmosphere. The facility operated defective Stage II equipment, failed to perform required tests, failed to perform daily and monthly inspections of the system, and failed to maintain records. In response to a Corrective Order previously issued by MDE, the facility has returned to compliance. **Status:** The company has 30 days to appeal the penalty. (Reference # ACP 01-03A)

**W.F. Wilson – Montgomery County**  
MDE issued a Notice of Assessed Civil Penalty on May 4, in the amount of \$1,750 to W. F. Wilson for failing to obtain an air quality permit to construct for a portable stone crusher. MDE requires a new construction permit for each site at which a portable crusher operates. This is to ensure that site-specific air quality issues are addressed in the permitting process for each new site. The company has stopped operating the crusher at the site in question. **Status:** The company has 30 days to appeal the penalty. (Reference # ACP 01-05A)

**DJF, Inc. – Baltimore County**  
MDE issued a Corrective Order and a Notice of Proposed Civil Penalty in the amount of \$5,000 to an Amoco gas station owned by DJF, Inc. on May 10, for violating gasoline vapor recovery requirements. The violations resulted in excess emissions of volatile organic compounds to the atmosphere. The violations included using defective vapor recovery equipment and failure to notify MDE of a failed test. The Corrective Order requires the station to stop pumping gasoline until the Stage II equipment is repaired and to submit a plan to demonstrate how this type of violation will be prevented in the future. **Status:** The company has 30 days to appeal the penalty and 10 days to appeal the order. (Reference #s PCP 01-10 and CO 01-04-03)

## Water Management Administration

**Bethlehem Steel Corporation, Baltimore County** – Bethlehem Steel Corpora-

tion paid \$40,000 to the Clean Water Fund on May 1, in settlement of alleged unauthorized wastewater bypasses from the facility's sinter plant treatment plant that occurred on eight occasions during the period October 2000 through January 2001. **Status:** Case closed. (Reference # PS-01-0206).

**Trans-Tech, Inc., Frederick County** – MDE and Trans-Tech, Inc. finalized an administrative consent order April 26, to resolve NPDES permit effluent violations at Trans-Tech's wastewater treatment plant located in Adamstown, Md. Under the terms of the consent order, the company is required to complete improvements to its wastewater treatment system to ensure compliance with discharge permit limits. The company has also agreed to pay an administrative penalty of \$40,000 to the Clean Water Fund. **Status:** Case closed. (Reference #CO-01-0229).

**William P. Egri, Prince George's County** – MDE issued a civil complaint for injunctive relief and civil penalties on May 10, in the Circuit Court of Prince George's County against William P. Egri, individually and t/a Accokeek Auto Parts, located at 17305 Manning Road in Accokeek, Md., for violations of Maryland laws and regulations pertaining to waterway construction, sediment pollution control, water pollution control and nontidal wetlands. In addition, the complaint alleges violations of an administrative order previously negotiated between MDE and Mr. Egri regarding NPDES stormwater permit requirements. The action seeks injunctive relief to require removal of the waterway obstructions and restoration of stream channels and disturbed nontidal wetlands and requires the facility to implement an approved stormwater pollution prevention plan and eliminate unlawful discharges. The action also seeks civil penalties of up to \$25,000 per day for each water pollution and nontidal wetlands violation as well as an additional \$40,000 stipulated administrative penalty for failure to implement an approved pollution prevention plan as previously agreed. **Status:** Case pending. (Reference #JC-01-0238).

**Arcadis G&M, Inc., Cecil County** – MDE and Arcadis G&M, Inc. finalized an administrative consent order on May 11 to address sediment pollution violations in a tributary of Basin Run, a natural trout stream in Cecil County. The sediment

pollution resulted from the Dec. 19, 2000, failure of a sediment basin embankment at the Woodlawn Landfill located on Waibel Road. Woodlawn Landfill is a National Priority List (NPL) Superfund site undergoing environmental rehabilitation under the direction of the Environmental Protection Agency (EPA). Arcadis is the general contractor retained by EPA to perform remediation of the site. Under the terms of the consent order, Arcadis has agreed to remove sediment from the stream and to conduct geomorphic and macroinvertebrate studies to determine the effectiveness of stream restoration. The stream restoration project is being done in cooperation with the Department of Natural Resources. The sediment removal phase of the project is underway and is expected to be completed by Sept. 1. **Status:** Case closed. (Reference #CO-01-0223).

**Town of Boonsboro, Washington County** – MDE and the Town of Boonsboro finalized an amended administrative consent order on May 2 regarding improvements to the town's wastewater treatment plant. Under the terms of the amended consent order, Boonsboro has agreed to perform further evaluation of the effectiveness of new wastewater treatment plant improvements in meeting NPDES permit limits for total phosphorus, biochemical oxygen demand, total suspended solids and total Kjeldahl nitrogen through June 15. **Status:** Case closed. (Reference # AACO-01-0232).

**Wayson Landholding Limited Partnership, Calvert County** – MDE issued an administrative complaint, order and penalty against Wayson Landholding Limited Partnership on May 4 for alleged sediment pollution violations at the North Calvert Industrial Park construction site located in Owings, Calvert County, Md. The order requires that corrective action be taken within 15 days to repair sediment control devices and to implement the approved sediment and erosion control plan for the site. The order also requires that within 30 days, Wayson submit a plan for mitigation of sediment pollution in the headwaters of Graham Creek. A penalty of \$84,500 has been assessed in this case. Wayson has 10 days to appeal the complaint and order and 30 days to appeal the penalty assessment. **Status:** Case pending. (Reference #AO-01-0227).

**J&V Investment Company, Worcester County** – MDE issued an administra-

tive complaint and penalty against J&V Investment Company on May 4 for alleged sediment pollution violations at a construction site located at 1342 Ocean Pines Parkway in Ocean Pines, Md. MDE has assessed an administrative penalty of \$7,650 in this case. J&V Investment has 30 days to appeal the penalty assessment. **Status:** Case pending. (Reference # AP-01-0209).

**Water Pollution Penalties, Statewide** – During the period April 15 to May 15, 2001, MDE collected an additional \$18,163 in administrative penalty payments to the Clean Water Fund in settlement of alleged water pollution violations from 14 establishments. MDE also collected a \$3,000 administrative penalty payment to the Sediment Fund in settlement of alleged erosion and sediment control violations at a construction site.

## Waste Management Administration

**Carroll Independent Fuel Company, Baltimore City** – MDE issued a Complaint, Order and Civil Penalty in the amount of \$10,000 on April 20 for violation of various oil pollution laws at 5901 Belair Road in Baltimore City. **Status:** The company has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the penalty. (Reference Number COV-2001-014)

**Carroll Independent Fuel Company, Prince George's County** – MDE issued a Complaint, Order and Civil Penalty in the amount of \$5,000 on April 30 for violation of the state's Oil Control Laws and Regulations at 10004 Dubarry St., Glenn Dale, Md. **Status:** The company has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the penalty. (Reference #: COV-2001-025)

**Paul Petroleum Products, Inc. Baltimore City** – MDE issued a Complaint, Order and Civil Penalty on April 20 in the amount of \$40,000 for violations of Maryland's Oil Pollution Laws at 5901 Belair Road, Baltimore City. **Status:** The company has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the penalty. (Reference #: COV-2001-015)

**Baltimore Country Club, Inc. Golf Course Maintenance Operations (11700 Jennifer Road, Timonium, Md.** - Baltimore County) – Complaint and Adminis-

# For the Record

The following is a partial list by county of applications received by MDE and other permitting activity between April 16 and May 15, 2001. For more information on these permits, please contact MDE's Environmental Permit Service Center at (410) 631-3772.

## Allegany

AES WARRIOR RUN - 11600 Mexico Farms Road, Southeast, Cumberland, Md. 21502. (99-OPT-2014A) Oil operations permit for above ground storage tank and transportation

CUMBERLAND WASTEWATER TREATMENT PLANT - East Offutt Street, Cumberland, Md. 21502. (01DP0567) Major surface municipal discharge permit

FROSTBURG WTP - 19166 National Highway NW, Frostburg, Md. 21532. (01DP2560) Surface municipal discharge permit

G & S COAL COMPANY - MILLER ROAD MINE - Miller Road, Barton, Md. 21521. (01DP3389) Surface industrial discharge permit

SCARPELLI FUNERAL HOME - 15205 McMullen Highway, Cresaptown, Md. 21502. (2001-01-00260) Air quality permit to operate

TRI-STAR MINING COMPANY - Barton, Md. (SM-91-419) Application Renewal

## Anne Arundel

B & B BUS LINES - 43 Thomas Ave., Brooklyn, Md. 21225. (01DP2651) Groundwater industrial discharge permit

CLASSIC COLLISION CENTER - 115 West Central Ave., Unit B, Edgewater, Md. 21037. (TR6514) An air permit to construct for one paint spraybooth

GABLE SIGNS & GRAPHICS, INC. - 7440 Fort Smallwood Road, Baltimore, Md. 21226. (TR6516) An air permit to construct for one paint spraybooth

MILLERSVILLE LANDFILL - 389 Burns Crossing Road, Severn, Md. 21144. (TR6512) An air permit to construct for one flare

PST RUBBLE LANDFILL EXPANSION - 4431 Sands Road Near Bayard, Harwood, Md. 20776. Solid waste rubble landfill permit

## Baltimore City

BALTIMORE CITY DEPARTMENT OF PUBLIC WORKS - 300 ABEL WOLMAN Municipal Building, Baltimore, Md. 21202. (01-1060) Sewerage permit to construct facility for process evaluation at the Back River wastewater Treatment Plant

BALTIMORE CITY DEPARTMENT OF PUBLIC WORKS - 300 ABEL WOLMAN Municipal Building, Baltimore, Md. 21202. (01-1067) Sewerage permit to upgrade electrical distribution at the Back River Wastewater Treatment Plant

DELTA CHEMICAL CORPORATION - 2601 Cannery Ave., Baltimore, Md. 21226. (TR6543)

An air permit to construct for modification of bulk aluminum storage

DORACON CONTRACTING, INC. - 146 North Broadway St., Baltimore, Md. 21205. (TR6542) an air permit to construct for one portable crushing plant

FMC CORPORATION - 1701 East Patapsco Ave., Baltimore, Md. 21226. (01DP0499) Major surface industrial discharge permit

GEO SPECIALTY CHEMICALS, INC. - 1920 Benhill Ave., Baltimore, Md. 21226. (TR6519) an air permit to construct for one chemical process line

LENMAR, INC. - O'DONNELL STREET - 4701 O'Donnell St., Baltimore, Md. 21224. (2001-24-1056) Air quality part 70 operating permit

MILLENNIUM SPECIALTY CHEMICALS - ST. HELENA - 2701 Broening Highway, Baltimore, Md. 21222. (01DP0318) Major surface industrial discharge permit

ST. LAWRENCE CEMENT - 3800 Hawkins Point Road, Baltimore, Md. 21226. (TR6500) an air permit to construct for cement transfer silo, three silos, truck spout

TATE & LYLE NORTH AMERICAN SUGARS, INC. - 1100 Key Highway East, Baltimore, MD 21230. (01DP0376) Major surface industrial discharge permit

WEYERHAEUSER COMPANY - 3400 Biddle St., Baltimore, Md. 21213. (TR6497) An air permit to construct for one glue station, one corrugator, one diecutter

## Baltimore County

ARBUTUS BUS FACILITY - 3216 Transway Road, Arbutus, Md. 21227. (2001-OPT-10940) Oil operations permit for above ground storage tank and transportation

BALTIMORE COUNTY DEPARTMENT OF PUBLIC WORKS - 111 W. Chesapeake Ave., Towson, Md. 21204. (01-1051) Sewerage permit to construct a Franklin Station Wastewater Pumping Station and a force main along Reisterstown Road and Berrymans Lane

C & C PRESS NET, INC. - 7110 Golden Ring Road, Baltimore, Md. 21221. (TR6487) An air permit to construct for one printing press

HI IMAGE GRAPHICS, INC. - 10534 York Road, Suite 107, Hunt Valley, Md. 21030. (TR6547) An air permit to construct for one printing press

MAIL-WELL LABEL - 6901 Rolling Mill Road, Baltimore, Md. 21224. (TR6541) An air permit to construct for one printing press

SIMKINS INDUSTRIES, INC. - 201 River Road, Catonsville, Md. 21228. (01DP1779) Surface industrial discharge permit

WILHELM OIL TERMINAL - 9502 Liberty Road, Randallstown, Md. 21133. (TR6509) Received an air permit to construct for one soil vapor extraction system

## Calvert

ARTHUR SCOTT CRANSTON, CV-29 - 8052 Pushaw Station Road, Owing, Md. 20736. Sewage sludge application on agricultural land

HOWARD ANDERSON PROPERTY, CV-47 - 7141 Old Bayside Road, Chesapeake Beach, Md. 20732. Sewage sludge application on agricultural land

LUSBY FASTOP - 11760 H. G. Trueman Road, Lusby, Md. 20657. (01DP3388) Groundwater industrial discharge permit

ST. LEONARD FASTOP - 4990 St. Leonard Road, St. Leonard, Md. 20685. (01DP3387) Groundwater industrial discharge permit

## Caroline

CAROLINE COUNTY BOARD OF EDUCATION - 414 Gay St., Denton, Md. 21629. (01-1057) Sewerage permit to upgrade the existing wastewater treatment plant serving Colonel Richardson Middle and High School

CAROLINE COUNTY BOARD OF EDUCATION - 414 Gay St., Denton, Md. 21629. (01-1058) Sewerage permit to upgrade the existing wastewater treatment plant serving North Caroline High School

CAROLINE COUNTY HUMANE SOCIETY - 407 West Bell St., Ridgely, Md. 21660. (TR6544) an air permit to construct for one animal crematory

## Carroll

CHARLES J. MILLER, INC. - 3514 Basler Road, Hampstead, Md. 21074. (2000-OPV-3341) Oil operations permit for transportation

COMMISSIONERS OF CARROLL COUNTY - 225 North Center St., Westminster, Md. 21157. (01-1053) Water permit to lay water mains along Hollenberry Road and Obrecht Road, west of MD Route 32, Sykesville

MILLER ASPHALT PRODUCTS, INC. - 390 Vision Way Road, Westminster, Md. 21158. (TR6495) an air permit to construct for drum hot mix asphalt plant-replace existing

SAM & DAVE LEASE FARM - 2300 Marston Road, New Windsor, Md. 21776. Sewage sludge application on agricultural land

SOUTH CARROLL SWIM CLUB - 1900 West Liberty Road, Westminster, Md. 21157. (01-1061) Sewerage permit to construct wastewater treatment facilities at the South Carroll Swim Club, Westminster

WESTMINSTER WWTP - 1161 Old New Windsor Pike, Westminster, Md. 21158. Sewage sludge transportation permit

## Cecil

CECIL COUNTY DEPARTMENT OF PUBLIC WORKS - 129 East Main St., Elkton, Md. 21921. (01-1062) Sewerage permit to upgrade

the Cherry Hill Wastewater Treatment Plant, south of the intersection of Route 213 and Route 277 on Beauchamp Road

D.M. STOLTZFUS AND SON, INC. - Talmage, PA (77-SP-0065) Modification for a surface mine permit located on 1 mile east of Elk Mills

INDEPENDENCE CONSTRUCTION MATERIALS - ELKTON PLANT - 618 West Pulaski Highway, Elkton, MD 21921. (2001-07-00136) Air quality permit to operate

MARYLAND MATERIALS, INC. - 264 Quarry Road, North East, MD 21901. (TR6490) an air permit to construct to add 240 tph crusher to existing plant

NORTON PETROLEUM CORPORATION - 401 West Main Street, Elkton, MD 21921. (2001-OPT-2550) Oil operations permit for above ground storage tank and transportation

YORK BUILDING PRODUCTS - PERRYVILLE - 4080 Pulaski Highway, Perryville, MD 21903. (2001-OPT-56187) Oil operations permit for above ground storage tank and transportation

## Charles

FOREST PARK BAPTIST CHURCH - 12995 Church Road, Waldorf, MD 20601. (01DP3386) Groundwater municipal discharge permit

WELCH PIT SOUTHSTAR INC. PROPERTY - Route 5, Waldorf, MD 20601. (S-96-08-3692-A2) Sewage sludge application on marginal land

## Dorchester

CECIL & SYLVIA GANNON, DR-38 - Mount Zion Road, Federalsburg, Md. 21632. Sewage sludge application on agricultural land

CECIL GANNON FARM, DR-22 - Mount Zion And Whitely Roads, Federalsburg, Md. 21632. Sewage sludge application on agricultural land

JOSEPH H. LAYTON, JR. PROPERTY, DR-46 - 4644 Ravenwood Road, Vienna, Md. 21869. Sewage sludge application on agricultural land

NAS PATUXENT RIVER - WEBSTER OUTLYING FIELD - Villa Road, St. Indigoes, MD 20684. (99DP2523) Surface municipal discharge permit

PHILLIP MOORE PIT - 20500 Point Look-out Road, Callaway, MD 20620. (00MM9719) General permit registration for discharge from borrow pit

# Act now to save at the pump

(NAPSI)-An automobile is a necessity for many Americans. Unfortunately, with gas prices soaring, cars are becoming more expensive to operate.

Owning a vehicle also has many hidden costs, including oil industry subsidies, military protection of foreign oil

supplies and the cost of air pollution and pollution related illness.

There are things we can do to cut our gas bill and our vehicle's pollution. To avoid the pump entirely, try walking and biking, public transportation, or telecommuting.

If you need your car every day, you can save at the pump by completing regular maintenance on your wheels and brakes as well as your engine. Simply keeping your tires properly inflated could save you \$135 per year.

You might also try to stop speeding. (You know you should, anyway.) Cruise control and overdrive gears also improve fuel economy.

When buying a new car, consider a fuel-efficient car or truck. Better yet, purchase one powered by alternative fuels or electric and hybrid-electric drives. They are far more efficient-and cleaner-than your current car.

To learn more about advanced vehicle technologies visit [www.yournextcar.org](http://www.yournextcar.org).

## NOTES

Continued from Page 7

trative penalty for \$12,500 issued on April 24, 2001 for violations of Maryland's law and regulations regarding Controlled Hazardous Substances. **Status:** The company has 10 days to request a hearing on the Complaint and 30 days to request a hearing on the administrative penalty. ## MDE donation makes school garden blossom

The Maryland Department of the Environment (MDE) recently donated eight azaleas from its spring lobby display to students at Dundalk Middle School for their Teachers' Memorial Garden. MDE Event Coordinator Don Mauldin, right, presented the azaleas May 4 to teacher Jermaine Ellerbe and members of the school's Future Teachers of Maryland Club. The donation was organized by MDE employee Sabrina Strohmiere, whose son is a member of the club.

## For the Record
