

February 1, 2020

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Saturday, February 29, 2020.

Water Supply Program - (410) 537-3590

County: Caroline

CO1993G116/06: Bob Schoonover has applied to increase an existing appropriation from an annual average of 117,100 gallons of water per day (gpd) and an average of 816,300 gpd in the month of maximum use to 355,000 gpd and 2,139,000 gpd, respectively, for crop irrigation and a poultry operation. Water will be withdrawn from thirteen wells, all in the Columbia aquifer. The project is located at 26543 Whiteleysburg Road, Greensboro, Caroline County, Maryland.

County: Cecil

CE2016G001/02: SunMed Growers, LLC has applied to increase an existing appropriation from an annual average of 19,600 gallons of groundwater per day (gpd) and an average of 61,000 gpd during the month of maximum use to 90,000 gpd and 159,000 gpd, respectively. Water is used for a potable supply, sanitary facilities, and greenhouse irrigation, and is proposed to also be utilized for evaporative cooling. Water will be withdrawn from one new and two existing wells, all in the Magothy aquifer. The project is located at 935 Cecilton-Warwick Road, Warwick, Cecil County, Maryland.

CE2020G001/01: Jonathan Quinn has applied to appropriate and use an annual average of 107,200 gallons of groundwater per day (gpd) and an average during the month of maximum use of 651,600 gpd for crop irrigation. Water will be withdrawn from two new wells in the unconfined Aquia aquifer. The project is located at 720 Sassafras Road, Warwick, Cecil County, Maryland.

County: Queen Annes

QA2019G009/01: Pippin, LLC has applied to appropriate and use an annual average of 129,200 gallons of groundwater per day (gpd) and an average of 785,600 gpd in the month of maximum use for crop irrigation. Water will be withdrawn from two wells in the Columbia aquifer. The project is located at 200 Palmatarys Farm Lane, approximately three miles southeast of Church Hill, Queen Anne's County, Maryland.
