

**April 1, 2021**

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Friday, April 30, 2021.

**Water Supply Program - (410) 537-3590**

**County: Caroline**

CO2021S004/01, CO2021G002/01, & CO2021G003/01: AquaCon Maryland LLC. has applied to appropriate and use a total annual average allocation of 2,203,000 gallons of water per day (gpd) for a land based salmon aquaculture facility that will be split between three permits:

CO2021S004/01- requests to withdraw water from an intake on Marshyhope Creek. The allocation under this application is proposed to be an annual average of 2,050,000 gpd and a maximum daily withdrawal of 2,300,000 gallons.

CO2021G002/01- requests to withdraw water from one new well in the Upper Patapsco aquifer. The allocation under this application is proposed to be an annual average of 2,050,000 gpd and an average during the month of maximum use of 2,300,000 gpd.

CO2021G003/01- requests to withdraw water from two wells in the Columbia aquifer. The allocation under this application is proposed to be an annual average of 153,000 gpd and an average during the month of maximum use of 187,000 gpd.

The project is located at 2960 Wright Road, Federalsburg, Caroline County, Maryland.

**County: Dorchester**

DO2021G001/01: Gregory N. Turner has applied to appropriate and use an annual average of 63,000 gallons of groundwater per day (gpd) and an average of 382,500 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from three wells in the Columbia aquifer. The project is located at 4805 Skinners Run Road, Hurlock, Dorchester County, Maryland.

DO2021G002/01: David W Nickerson, Trustee has applied to appropriate and use an annual average of 66,500 gallons of groundwater per day (gpd) and an average of 403,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from up to three wells in the Columbia aquifer. The project is located on the south side of Delaware Avenue, approximately 0.5 mile west of its intersection with Main Street, Hurlock, Dorchester County, Maryland.
