## Certification that Maryland’s Existing Emission Statements Regulation Addresses the Requirements of the CAA Section 182(a)(3)(B) for the 2015 Ozone NAAQS

On October 26, 2015, EPA promulgated a revised 8-hour ozone NAAQS<sup>1</sup> of 0.070 parts per million (ppm). Upon promulgation of a new or revised NAAQS, the Clean Air Act (CAA or Act) requires EPA to designate as nonattainment any area that is violating the NAAQS, based on the three most recent years of ambient air quality data at the conclusion of the designation process. The following areas in Maryland were designated as nonattainment for the 2015 Ozone Standards:

**Table 1: Maryland 2015 Ozone NAAQS Designations<sup>2</sup>**

Ozone Nonattainment Area Name	MD Counties	Area Classification
Baltimore, MD	Anne Arundel	Marginal
	Baltimore	
	Baltimore City	
	Carroll	
	Harford	
	Howard	
Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE	Cecil	Marginal
Washington, DC-MD-VA	Calvert	Marginal
	Charles	
	Frederick	
	Montgomery	
	Prince George’s	

Based on these nonattainment designations, Maryland was required to develop a SIP revision addressing ozone nonattainment requirements of the CAA for the nonattainment areas. Specifically, pursuant to CAA section 182(a)(3)(B), Maryland was required to submit a SIP revision addressing emissions statements for the Ozone Nonattainment Areas. The Emission Statement requirement under the Clean Air Act (“Act”) section 182(a)(3)(B), is applicable to all areas designated nonattainment for the 8-hour ozone national ambient air quality standard (NAAQS) and classified marginal or higher under subpart 2, part D, title I of the Act.

Section 182(a)(3)(B) requirements are as follows:

(B) Emissions statements

(i) Within 2 years after November 15, 1990, the State shall submit a revision to the State implementation plan to require that the owner or operator of each stationary source of oxides of nitrogen or volatile organic compounds provide the State with a statement, in such form as the Administrator may prescribe (or accept an equivalent alternative developed by the State), for classes or categories of sources, showing the actual emissions of oxides of nitrogen and volatile organic compounds from that source. The first such statement shall be submitted within 3 years after November 15, 1990. Subsequent statements shall be submitted at least every year thereafter. The statement shall contain a certification that the information contained in the statement is accurate to the best knowledge of the individual certifying the statement.

<sup>1</sup> 80 FR 65292

<sup>2</sup> 83 FR 25776

(ii) The State may waive the application of clause (i) to any class or category of stationary sources which emit less than 25 tons per year of volatile organic compounds or oxides of nitrogen if the State, in its submissions under subparagraphs 1 (1) or (3)(A), provides an inventory of emissions from such class or category of sources, based on the use of the emission factors established by the Administrator or other methods acceptable to the Administrator.

Maryland is submitting a SIP revision stating that its existing Rule, COMAR 26.11.01.05-1 “Emissions Statements”, satisfies the requirements to address the Maryland Ozone Nonattainment Areas under Clean Air Act section 182(a)(3)(B). COMAR 26.11.01.05-1 was initially adopted by Maryland on 11/13/1992 and had an effective date of 12/07/1992, then was approved by EPA on 10/12/1994<sup>3</sup> The regulation is listed under the SIP approvals under the Code of Federal Regulations – 40 CFR Part 52, Subpart V—Maryland § 52.1070 Identification of plan.

#### **.05-1 Emissions Statements.**

A. Applicability. This regulation applies to a person who owns or operates any installation, source, or premises that is located in:

- (1) Baltimore City, or in Anne Arundel, Baltimore, Calvert, Carroll, Cecil, Charles, Frederick, Harford, Howard, Kent, Montgomery, Prince George's or Queen Anne's counties, and has total actual emissions of either VOC or NOx from all installations and sources on a premises of 25 tons or more during a calendar year;
- (2) Allegany, Caroline, Dorchester, Garrett, St. Mary's, Somerset, Talbot, Washington, Wicomico, or Worcester counties, and has total actual emissions of either VOC or NOx from all installations and sources on a premises of 50 tons or more of VOC or 100 tons or more of NOx during a calendar year.

B. General Requirements.

- (1) By April 1 of each year, beginning with April 1, 1993, a person subject to this regulation shall submit to the Department an emissions statement for the previous calendar year that meets the requirements of this regulation.
- (2) A person submitting an emissions statement shall certify that the information in the emissions statement is accurate to the person's best knowledge. The certifying individual shall be:
  - (a) Familiar with each installation and source for which the statement is submitted; and
  - (b) Responsible for the accuracy of the statement.
- (3) If actual emissions from a source or premises for any year after calendar year 1992 equal or exceed the applicable emission levels prescribed in §A(1) or (2) of this regulation, an emissions statement is required for that year and each following year unless the source demonstrates, to the satisfaction of the Department, that emissions have been permanently reduced and the source no longer has the potential to emit emissions that exceed the applicable levels.

C. Emissions Statement Content. Emissions statements required by §B of this regulation shall be organized by premises, submitted on a form obtained from the Department, and include the following information:

- (1) Identification of each installation or source at the premises that discharges VOC or NOx, and the actual daily and annual emissions from each installation or source;
- (2) An explanation of the method used to determine emissions from each installation or source and operating schedules and production data that were used to determine emissions;
- (3) Beginning with the emissions statement for calendar year 1993, an explanation for any increases or decreases

in emissions for each installation or source if reported emissions differ from the emissions reported in the previous year's emissions statement; and

(4) Other relevant information as required by the Department.

The enforceable commitments are to submit measures by October 31, 2001 for additional emission reductions as required in the attainment demonstration test, and to revise the SIP and motor vehicle emissions budgets by October 31, 2001 if the additional measures affect the motor vehicle emissions inventory; and to perform a mid-course review by December 31, 2003.

(l) EPA approves the following mobile budgets of the Baltimore area attainment plan:

Transportation Conformity Budgets for the Baltimore Area

Type of control strategy SIP	Year	VOC (TPD)	NOX (TPD)
Attainment Demonstration	2005	55.0	146.9

(1) [Reserved]

(2) Similarly, EPA is approving the 2005 attainment demonstration and its current budgets because Maryland has provided an enforceable commitment to submit new budgets as a SIP revision to the attainment plan consistent with any new measures submitted to fill any shortfall, if the new additional control measures affect on-road motor vehicle emissions.

(m) EPA approves the State of Maryland's revised 1990 and the 2005 VOC and NOX highway mobile emissions inventories and the 2005 motor vehicle emissions budgets for the one-hour ozone attainment plans for the Baltimore severe ozone nonattainment area and the Cecil County portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area. These revisions were submitted by the Maryland Department of the Environment on September 2, 2003. Submission of these revised MOBILE6-based motor vehicle emissions inventories was a requirement of EPA's approval of the attainment demonstration under paragraphs (h) and (k) of this section.

(n) EPA approves revisions to the Maryland State Implementation Plan for Post-1996 Rate of Progress (ROP) Plans for the Baltimore severe 1-hour ozone nonattainment area. These revisions were submitted by the Secretary of the Maryland Department of the Environment on December 23, 2003 and consist of the following:

(1) Revisions to the base year 1990 emissions inventory which reflect the use of the MOBILE6 motor vehicle emissions model. These revisions establish motor vehicle emissions inventories for 1990 of 165.14 tons per day of volatile organic compounds (VOC) and 228.21 tons per day of oxides of nitrogen (NOX).

(2) Revisions to the year 2005 motor vehicle emissions budgets (MVEBs) for transportation conformity purposes, reflecting the use of the MOBILE6 motor vehicle emissions model. These revisions establish a motor vehicle emissions budget of 55 tons per day of volatile organic compounds (VOC) and 144.5 tons per day of oxides of nitrogen (NOX). EPA approved new 2005 MOBILE6-based MVEBs for the Baltimore area's 1-hour ozone attainment demonstration on October 27, 2003 (68 FR 61106). Those MVEBs became effective on November 26, 2003. The approved 2005 attainment plan MVEBs budgets are 55.3 tons per day of VOC and 146.9 tons per day of NOX. The MVEBs of the 2005 ROP plan are less than the MVEBs in the approved attainment demonstration.

These more restrictive MVEBs, contained in the ROP plan, are the applicable MVEBs to be used in transportation conformity demonstrations for the year 2005 for the Baltimore area.

(3) Revisions to the 2005 ROP plan to reallocate some of the contingency measures established in prior SIP revisions to the control measures portion of the plan. EPA guidance allows states an additional year to adopt new contingency measures to replace those reallocated to the control measures portion of the plan. The State of Maryland's December 23, 2003 SIP revision submittal includes an enforceable commitment to replace those contingency measures reallocated to the control measures portion of the 2005 ROP plan and to submit these additional contingency measures by October 31, 2004.

(o) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that the Washington, DC severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Washington, DC severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

(p) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual 8-hour ozone NAAQS.

(y) Determination—EPA has determined that, as of July 12, 2012, the Baltimore 1-hour ozone nonattainment area has attained the 1-hour ozone standard and that this determination obviates the requirement for Maryland to submit for the Baltimore area the 1-hour ozone contingency measure requirements of section 172(c)(9) of the Clean Air Act.

(z) EPA approves the attainment demonstration portion of the attainment plan for the 1997 8-hour ozone NAAQS for the Philadelphia Area submitted as a revision to the State Implementation Plan by the Secretary of the Maryland Department of the Environment on June 4, 2007. EPA also approves the 2009 motor vehicle emissions budgets associated with the attainment demonstration for Cecil County, Maryland.

The maintenance plan includes two sets of VOC and NOX MVEBs: The MVEBs without transportation buffers are effective as EPA has determined them adequate for transportation conformity purposes; the MVEBs with transportation buffers will be used only as needed in situations where the conformity analysis must be based on different data, models, or planning assumptions, including, but not limited to, updates to demographic, land use, or project-related assumptions, than were used to create the set of MVEBs without transportation buffers. The technical analyses used to demonstrate compliance with the MVEBs and the need, if any, to use transportation buffers will be fully documented in the conformity analysis and follow the Transportation Planning Board's (TPB) interagency consultation procedures.
