

Maryland Heating Fuel Provider Reporting Program Notification **December 12, 2025**

A Notice of Final Action for COMAR Chapter 26.11.44 titled Maryland Heating Fuel Provider Reporting Program (HFRP) was published in the Maryland Register. This Chapter establishes the requirement for heating fuel providers to report the amount of heating fuel delivered for final sale or consumption in Maryland.

In response to valuable feedback received during our public comment period, the Department has streamlined the reporting process by consolidating four quarterly reports into a single, annual requirement for monthly data. This change will simplify compliance for heating fuel providers, who must submit an annual report detailing the monthly amount of fuel delivered in Maryland, separated by fuel type, sector, and county. Heating fuel providers are to begin collecting fuel delivery data in January 2026. The initial report for calendar year 2026 data will be due by April 1, 2027, with the annual reporting deadline set for April 1st each year thereafter. Please review the “Need to Know Guide” or the regulation for more details on the program’s requirements.

To ensure you receive all program updates and resources, please sign up for [MDE's Clean Heat Rules email list](#) and select the “heating fuel provider” checkbox on the second page. MDE will share essential information on registration for the HFRP, the annual reporting template, and announcements for future work groups focused on program implementation through this email list and the [Air Quality Compliance website](#) in the coming months.

If you have any questions, please email us at cleanheat.mde@maryland.gov with the subject “HFRP” or give us a call at 410-537-3890.
