Sparrows Point , MD 21219

51 sample(s) were received by Curtis B. Read of Microbac laboratories, Baltimore Division on 4/4/2011 1:33:00 PM and sample(s) condition(s) were checked and found to be acceptable unless otherwise noted in the 'Cooler Receipt Log' or 'Statement of Qualifications' sections of this report. The samples were logged into the LIMS by Mark B. Horan on 3/21/2011 8:09:10 AM and compared to the client DQO. Any deviations from the client DQO and method specific quality control requirements are noted in the 'Statement of Data Qualifications'.

Other Notes/Comments:

Several samples were resampled for Alkalinity analysis which was repeated due to Quality Control Standards being out of acceptance limits, and the recommended holding time had expired before reanalysis could occur.

Samples required numerous dilutions and reanalyses due to concentrations, matrix issues and Quality Control issues. They are noted in the statements beginning on the next page.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.
