

# Facts About...

Mid Atlantic Finishing, Inc.  
State Master List Site (MD-419)

---

## Site Location

The approximate 0.8-acre industrial site is located at 4656 Addison Road in Capitol Heights, Prince George's County, Maryland. The site is identified on Prince George's County tax map 58, grid E-4 as parcel 17. The surrounding area is a mix of residential, commercial and industrial properties.

## Site History

The Mid Atlantic Finishing, Inc. began operations on February 17, 1976 as a metals electroplating facility. Hazardous waste solid and liquid sludge is generated as a by-product of the electroplating process and the facility is designated as a Resource Conservation and Recovery Act (RCRA) large quantity generator (EPA Identification Number MDD985386143). The facility is inspected by the Maryland Department of the Environment's (MDE) Hazardous Waste Program and is in compliance. The facility is also permitted by MDE's Air and Radiation Management Administration.

## Environmental Investigations

In May 1992, MDE completed an Environmental Priorities Initiative Preliminary Assessment that photo-documented the facility's operations, reviewed and documented the ownership and site use history, regulatory actions and permits and physical characteristics of the site and vicinity.

Since the facility is regularly inspected under the RCRA program by MDE's Hazardous Waste Program, the site was given "No Further Remedial Action Planned" status by the U.S. Environmental Protection Agency on January 23, 1996 and the site was archived from the inventory of active sites.

## Current Status

MDE's Land Restoration Program has no further requirements for this site at this time.

## Contact

For additional information, please contact the Land Restoration Program at 410 537-3440.
