FACTS ABOUT: OIL-CONTAMINATED SOIL ACCEPTANCE FACILITIES

The following is a list of facilities that are permitted by the Maryland Department of the Environment (MDE) to accept oil-contaminated soil for treatment and recycling. MDE makes no claims as to the completeness of the list or the quality of work performed by these facilities. Inclusion on this list is not to be considered an endorsement of these facilities or an approval to accept contamination of any kind. Spill cleanup contractors and consultants may also be contacted for information on the removal and proper disposal of oil-contaminated soil. In addition to the below facilities, certain solid waste acceptance facilities are permitted to accept oil-contaminated soil. Other states may have similar lists.
