STRIP MINING

The Strip Mining Laws of the State of Maryland went into effect on June 1, 1955. To engage in open pit mining of bituminous coal, the operator must first file an application as provided by this department. Each application will cover four acres of coal to be stripped. This must be accompanied by a Form of Bond, Cash or U. S. Government Securities in the amount of four hundred dollars (\$400.00), one hundred dollars (\$100.00) per acre. The operator must also pay a filing fee of two hundred dollars (\$200.00). A PERMIT, giving the location of the acreage to be stripped, is then issued to the operator by the Bureau of Mines.

To further comply with this law, the operator must file an Operations Report within thirty (30) days after starting removal of overburden. Within six (6) months after the operation is finished or abandoned, the operator must file a Completion Report with the Bureau.

When the open pit mining operation is terminated and the operator has complied with all regulations set out in this law, the Director of the Bureau of Mines will issue a release of the bond, cash or securities as deposited with the State Treasurer.

The members of the team are Captain Carl Schell, Claude Boyce, Joseph DiGuistino, Jr., Haven Chapman, Kenneth A. Bray, Oliver Simon, Richard Sherwood and Jesse H. Reel. All of the members of this team reside in the vicinity of Kitzmiller, Maryland.

The Mine Rescue Team and the Maryland Bureau of Mines cooperate with the Maryland Civil Defense Agency to provide adequate rescue service for all cases of emergency.

SAFETY ORDERS

During the calendar year 1957, two Safety Orders were issued by the District Mine Inspectors of the Bureau of Mines.

The Safety Orders are listed as follows:

Harry B. Buckley, District Mine Inspector, District No. 3

May 21—

Numerous violations of the Mining Laws. The Safety Order was complied with.

August 8—

FATALITIES

No fatal accidents occurred in the coal mines of Maryland during the calendar year 1957. Maryland has had no fatal mine accidents since 1953. The Operators and Employees are again to be commended for the splendid record, and it is anticipated that SAFETY CONSCIOUSNESS will continue to produce fatality free years in the future.

LABOR CONDITIONS — 1957

Labor conditions during the year 1957 were not changed to any extent, in either Garrett or Allegany Counties. There were no work stoppages reported.

Several new strip operations were started in both Allegany and Garrett Counties.

ACTIVITIES OF FUEL COMBUSTION ADVISOR

For The Year 1957

During the year 1957, Mr. Rodney W. Selders, Fuel Combustion Advisor, spent 80 days in the office and laboratory at Westernport and 30 days at State Institutions. A total of 11 days were spent in the field collecting samples, advising on coal preparation, etc. Mr. Selders processed approximately 65 samples during the first half of the year. He spent two days in Washington, D. C., on special business for the Bureau of Mines.

Mr. Selders left State employment on July 9 to enter private industry.

The Department was without the services of a Fuel Combustion Advisor until September 4, when Mr. Robert D. Ewing of Frostburg, Maryland, entered State Service in this capacity.

Mr. Ewing spent 31 days in the office and laboratory at Westernport and three days at State Institutions. He spent a total of 14 days visiting various coal operations in the area. Mr. Ewing spent 32 days in the laboratory at the West Virginia Pulp and Paper Company at Luke, Maryland, studying laboratory and boiler room procedure.

Several complaints were received concerning the quality of the coal received at State Institutions. Some were found to be operational faults; some were due to high ash and moisture content of the coal; others were faults of design and operation of the furnaces.

After investigation of the complaint and conference with the supplier, most of the complaints from high ash content were corrected. The high moisture content was found to be mostly caused by the absorption of moisture in transit and after being stored under adverse conditions at the Institutions.

Most of the operational faults were quickly corrected. In some cases the faults of design and operation of present equipment is still under study.

Some complaints were caused by improper sizing of the coal for the institution to which it was delivered. After conferences with the supplier this was corrected.

REPORT OF VOCATIONAL MINING EDUCATION

THOMAS B. POWELL, Instructor

The Night Mining Classes opened their sessions on November 5, 1956, and ended April 19, 1957.

The classes were instructed by Thomas B. Powell, District Mine Inspector, assisted by District Mine Inspectors Harry B. Buckley and James H. Close.

The classes were conducted as follows:

Kitzmilller	Tuesday Night
Barton	Thursday Night
Frostburg	Friday Night

The Frostburg class was held at State Teachers College, while the class in Barton was held at the High School and the Kitzmilller class in The Community Building.

The Kitzmilller Class had an enrollment of 15 students; the Frostburg class 18 students and the Barton class had 17 students.

The subjects studied were:

- Supervision of Personnel
- Mine Gases and Gas Testing
- Mine Ventilation
- Electricity
- Flame Safety Lamps
- Map Reading
- The Use of permissible explosives
- Mining Methods
- Mine Fires and Explosions

The classes met weekly and averaged two or more hours each. Much interest was shown in these classes, and perhaps the most important part of each class session was the student participation period. At this time, each student contributed by asking questions pertaining to mining problems and by giving others the benefit of his experiences with pertinent mining issues. There was enough interest shown in this portion of the class session, that the period often extended one hour or more beyond the regular closing time.

CONCLUSION

With the continued improvements in the coal industry, enough interest was displayed in Vocational Mining to carry on this program and demonstrated the continued need for this type of training.
