(2) Any person who mines coal by the open-pit or strip method without a permit issued by the Bureau of Mines shall be guilty of a misdemeanor punishable by a fine of not less than \$1,000 nor more than \$10,000 or by imprisonment for not more than two years, or by both fine and imprisonment. Each day a violation hereunder exists shall be a separate offense.

(e) In addition to any fine imposed by a violation of this section, every person convicted hereunder shall pay to the Director a sum sufficient to reclaim the area mined.

SEC. 2. And be it further enacted, That this Act shall take effect July 1, 1973.

The Land Reclamation Committee was created to recommend and approve all procedures for reclamation, conservation, and revegetation of area affected by open-pit mining within the State of Maryland. Such measures shall include, but not be restricted to, backfilling and grading, the restoration of plant cover, the prevention of erosion, the prevention of the creation of acid water, and any other actions which will be conducive to conservation and best utilization of the natural resources of Maryland. It shall be the duty of the Committee to review all mining and reclamation plans, progress reports and final reports. The Committee may inspect or have inspected any open-pit mining operation at any time in order to determine land reclamation, conservation and revegetation conditions. It is the duty of the Committee to establish plans and methods of procedure as well as practical guidelines for the prompt and adequate reclamation, conservation, and revegetation of all land disturbed by open-pit mining of bituminous coal within the State of Maryland. These plans, methods of procedure, and practical guidelines shall be submitted to the proper regulatory agency. Finally, the Committee is directed to review the strip mining laws of the State of Maryland to ensure compliance with the spirit of this Act.

The law also requires a detailed Mining and Reclamation Plan showing the Manner, Time and Distance for backfilling, drainage, planting, and general reclamation of the affected area.

The Revegetation Bond is separate from the Backfilling Bond and can vary from a minimum of \$50.00 to \$125.00 per acre as the Land Reclamation Committee determines.

Rules and Regulations supplementing the Maryland Strip Mine and Auger Mining Laws and designated as Regulation No. 1 are available from the Bureau of Mines.

Since early 1970, the Site Evaluation Committee has been active. This is composed of six members of the Land Reclamation Committee: Bureau of Mines, Mining Industry, Soil Conservation, Water Resources Administration, Forest Service, and Wildlife Administration; to go on site and evaluate permit and amended permit applications and report back to the Land Reclamation Committee. This Committee is most effective in working with the operators to carry out the laws as intended.

The Site Evaluation Committee spent 23 days investigating permit and amended permit applications. On numerous occasions, this Committee made spot checks on various operations.

Another effective procedure adopted by the Committee during the later part of 1970, is an open-acre limit, regardless of permit acres, set on each permit depending on type and amount of equipment, the size of the company, their past performance and ability to control their operation. This open-acre limit forces the operator to backfill as he goes along; whereas, in the past, he opened the whole area and then backfilled.

From January 1, 1972 through December 31, 1972, the Land Reclamation Committee held 12 regular meetings, 1 meeting to discuss "Guidelines", and 1 Special Hearing. Fourteen new Permits, 42 Amended Permits and 48 Annual Mining and Reclamation Progress Reports were processed. Two Permits were forfeited due to non-compliance.
